**AN EXPLORATORY STUDY ON PROGRAMMING
SKILL COMPETENCY AMONG ICT STUDENTS IN
MALAYSIA**

NORMASNIZA BINTI MAT GHANI

Report submitted in partial fulfillment of the requirements
for the degree of

Master of Science (Information Technology)

Faculty of Computer and Mathematical Sciences

January 2014

ABSTRACT

This paper presents the perceptions of employers and educators concerning the programming skills, knowledge and characteristics which help undergraduates to be more marketable. And, also gauge the understanding of programming skills and related issues among CS undergraduate students. The results of this survey indicate that undergraduates are agreed with suggestions given which they want many improvements in teaching and learning programming. By asking the perception from employers and education regarding on how to produce a quality graduates and be more marketable, it is possible for educators to enhance the teaching and learning to meet expectations and to make curriculum changes or adjustments to address these problems. While the study does not suggest that any dominant attributes are related to success in programming, there are some interesting outcomes which will have implications for teaching and learning.

ACKNOWLEDGEMENT

I would like to thank Allah SWT, because with His mercy I am able to complete my project paper to fulfill requirements of the IT Project (SYS 798) course. This project could not have been written without the assistance and guidance of Puan Suzana Zambri who not only served as my supervisor but also encouraged and challenged me throughout the academic program.

I also would like to thank all participants who took part in this study. Without the generous help of many people, it would have been very difficult for me to complete this project. I thank them all.

TABLE OF CONTENTS

	Page
STUDENT'S DECLARATION	i
ABSTRACT	ii
ACKNOWLEDGEMENT	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	viii
LIST OF FIGURES	ix
CHAPTER ONE: INTRODUCTION	
1.1 Overview	1
1.2 Research Background	1
1.3 Problem Statement	2
1.4 Research Aim	3
1.5 Research Objectives	3
1.6 Research Questions	3
1.7 Research Significance	4
1.8 Research Scope	5
1.9 Summary	6
CHAPTER TWO: LITERATURE REVIEW	
2.1 Introduction	7
2.2 Definition of Related Terminology	8
2.2.1 Information Communication Technology (ICT) Sector	8
2.2.2 ICT Skills	8
2.2.3 Computer Science (CS)	8
2.2.4 Programming	9
2.2.5 Novice	9
2.2.6 Undergraduate	9
2.3 Unemployment of Graduates in Malaysia	10
2.4 Lacks of Skills among Graduates	11

2.5 Demands for ICT Skills	15
2.6 Mismatch of Perceptions Employers and University	19
2.7 Issues of Seeking Qualified Undergraduates in Programming Skills	20
2.8 Understand the Perception and Perspectives from Three Target Groups	22
2.8.1 Related Research Concerning Undergraduates' Potential in Learning Programming	22
2.8.2 Educator's Perception of Teaching Programming Skills	25
2.8.3 Employer Perspectives	26
2.8.4 Universiti Teknikal Malaysia Melaka (UTeM) as a Case Study	28
2.8.5 Science Computer under Faculty of Information and Communication Technology (FTMK)	28
2.9 Summary	29

CHAPTER THREE: METHODOLOGY

3.1 Introduction	30
3.2 Descriptive Research Methodology	30
3.3 Research Model	32
3.3.1 Quantitative Research	32
3.3.2 Qualitative Research	33
3.4 Research Design	34
3.5 Mixed-Method Triangulation Approach	35
3.6 Planning	36
3.7 Data Collection	37
3.7.1 Primary Data	37
3.7.1.1 Questionnaire for Undergraduates	37
3.7.1.2 Interview with Employer and Educator	39
3.7.1.3 Interviews with Employers	40
3.7.1.4 Interview with Educators in UTeM	42
3.7.2 Secondary Data	43
3.7.2.1 Online Research	43
3.7.2.2 Offline Research	43
3.8 Data Analysis	44
3.8.1 Techniques for Data Analysis	44
