

Marker Less Augmented Reality With Compass Assistance

BY

MUHAMMAD ASYRAF BIN MOHAMMAD

BACHELOR OF SCIENCE (Hons) COMPUTER SCIENCE

**THESIS SUBMITTED IN PARTIAL FULFILLMENT OF
THE REQUIREMENT FOR THE DEGREE OF
BACHELOR OF SCIENCE**

**FACULTY OF COMPUTER AND
MATHEMATICAL SCIENCES**

UNIVERSITITEKNOLOGI MARA

MAY 2011

Acknowledgement

I would like to thank my supervisor, Dr. Fakhru bin Yusoff that guide me during the research and give some useful advice. Thanks for all the knowledge that been given during the research.

Thank you to CSC699 lecturer, Dr. Riya binti Mohd Rias for guiding us on report writing during the research.

I also want to thank my family that continuously support me from behind and motivate me during the research.

I also want to say thank you to my friend,
for lend me his phone for this project and
for guiding me on doing report writing. Thanks to my entire friend that keep motivate me during research process.

Abstract

This paper is about implementing augmented reality on android mobile phone. This augmented reality will be a marker less base. The allocation for the object will be base on compass direction that includes the degrees of azimuth and inclination. This compass controlled by accelerometer of the device.

TITLE	i
SUPERVISOR APPROVAL	ii
DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	vii
LIST OF TABLE	viii
1. Chapter 1 - Introduction	1
1.1 Background	1
1.2 Problem Statement	1
1.3 Objective	2
1.4 Scope	2
1.5 Significant	2
2. Chapter 2 - Literature Review	3
2.1 Augmented Reality	3
2.2 ANDROID	10
2.3 Accelerometer	10
3. Chapter 3 - Methodology	12
3.1 Research Framework	12
3.2 Research Methodology	14
3.2.1 Analysis	14
3.2.2 Design	15
3.2.3 Implementation	17
3.2.4 Test	17
4. Chapter 4 - Result and Finding	18
4.1 Introduction	18
4.2 Result	18
4.3 Finding	21
5. Chapter 5 - Conclusion and Recommendation	23
5.1 Conclusion	23
5.2 Recommendation	23
REFERENCE	25

List of Figure

2.1	Ultramobile PC is used as Magis Lens	4
2.2	Different type of device produce different rendering quality	4
2.3	AR kanji learning setup showing a car	5
2.4	JADE Main architectural element	7
2.5	Opting for network middleware architecture	7
2.6	Object exist in both world and real world	8
2.7	A user wearing mobile AR kit and hardware used	9
2.8	Influence of head and body rotation	9
2.9	Far field and near field	10
2.10	The axis accelerometer	11
3.1	Waterfall model	13
3.2	ARCOM layout	15
3.3	ARCOM flow chart	16
4.1	Before the value match	20
