ACKNOWLEDGEMENTS

BISMILLAHHIRAHMANIRRAHIM

In the name of Allah, The Most Gracious and The Most Merciful. Praise belongs to Allah SWT and blessing is on His Prophet SAW for the ultimate guidance. Without his consent, I would never have completed anything.

There are many people that I would like to thank. I would like to thank my supervisor Dr. Wan Adilah Wan Adnan for guiding me through two semester in completing my thesis. She has done more than I hope while I am doing this thesis. They have given valuable time, valuable guidance, suggestions and ideas, comments, support and encouragements to betterment of this thesis.

I would also like to express my highest gratitude to my family for their support during my difficult times especially in completing this thesis and always pray for my success. In addition, I also want to thank to all my friends who have helped me a lot during my research project until the completion of the thesis. And, last but not least, many thanks also to every single person who has directly and indirectly contributed to the successful completion of this project, I thank you all very much.

May Allah s.w.t bless you.

Wassalam.

ABSTRACT

Cybercrime is the new form crime in this globalization. Cybercrime had become one of the major threats towards human information security. Some people took the easy way to succeed in their life either for mentally satisfaction and financially satisfaction by committing cybercrime. The objective of this study is to investigate the factor influencing the behavioural intention towards committing cybercrime. This study involve the use of four attribute of Theory of Planned Behaviour (TPC) which are attitude, subjective norm, perceived behavioural control and behavioural intention in investigating the factor that influence behavioural intention to commit cybercrime among students. This study provide a significant towardsThis study was conducted in Universiti Teknologi Mara (UiTM) Shah Alam among Computer Science students from Faculty of Computer and Mathematical Science due to several justification that relevant to the research. From the findings, the result stated that the factor that gives the major impact towards behavioural intention towards cybercrime is student attitude itself rather than perceived behavioural control and subjective norm. Finally, some recommendations provided in the research for a future purpose in order to enhance the research.

TABLE OF CONTENTS

CONTENTS	PAGE
SUPERVISOR'S APPROVAL	i
DECLARATION	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
TABLE OF CONTENTS	v
LIST OF FIGURES	vi
LIST OF TABLES	vii
LIST OF ABBREVIATIONS	viii
LIST OF APPENDICES	ix
CHAPTER ONE: INTRODUCTION	
1.1 Research Background	1
1.2 Problem Statement	3
1.3 Aim	3
1.3 Research Question	4
1.4 Research Objective	4
1.5 Scope	4
1.6 Limitation	4
1.7 Significant	5
CHAPTER TWO: LITERATURE REVIEW	
2.1 Definition Of Cybercrime	6
2.2 Type Of Cybercrime	7
2.3 Cybercrime Law	9
2.3.1 Computer Crime act and punishment	10
2.4 Factor Contribute To Cybercrime	11
2.5 Behavioural Intention	12
2.5.1 Cybercrime Intention	12
2.6 Theory of Planned Behaviour	14
CHAPTER THREE: RESEARCH METHODOLOGY & APPROACH	
3.1 Introduction	16
3.2 Problem Identification	18
3.3 Knowledge Acquisition	19

3.3.1	Articles	19
3.3.2	Journals	19
3.3.3	Books	19
3.4	Design Instrument	20
3.5	Reliability Test	21
3.6	Data Collection	22
3.7	Analysis & Finding	23
3.7.1	Correlation Coefficient Test	23
3.8	Documentation	24
3.9	Theoretical Framework	24
3.10	Inferential Statistic	25
3.11	Summary of Chapter	26

CHAPTER FOUR: ANALYSIS AND DISCUSSION

4.1	Demographic Profile of Respondent	28
4.2	Reliability Test Result	30
4.3	Correlation Coefficient Test Result	31
4.3.1	Relationship between Attitude and Intention	31
4.3.2	Relationship between Subjective Norm and Intention	32
4.3.3	Relationship between Perceived Behavioural Control and Intention.	32
4.4	Summary: Results of Correlation Coefficient Test of Relationship	33
4.5	Cross Tabulation	34
4.5.1	Cross Tabulation 1	34
4.5.2	Cross Tabulation 2	35
4.5.3	Cross Tabulation 3	35
