ABSTRACT

Organizations often have information systems belonging to different computer generations. These systems contain much valuable data to the organizations concerned. However, these systems are often unable to communicate with each other, due to incompatibilities. Moreover, replacing these systems with new systems is also very costly. Therefore the latest trend is integrating the existing systems with each other with the help of different system integration technologies. Among organizations especially in government sector, it is increasingly common to outsource their Information System (IS) especially System Integration (SI) to a vendor which is System Integrator. When the organization information systems are integrated with new technology they bring about various effects and issue to the system integrator and organizations itself in concern. This paper will be an exploratory study of the architecture approach and architecture adopted by Xybase as a system integrator in implementing system integration for various organizations and also to find the issues / barriers which are the actual problems of implementation being faced. Understanding the issues is paramount to select the correct solution and the overall success of system integration implementation. The result shall be beneficial as it will serve as guidelines and considerations for both system integrators and organizations itself in successfully embark in system integration effort.

Keywords

System Integration, System Integrator, Information Systems, Enterprise Application Integration.

ACKNOWLEDGEMENTS

My utmost gratitude to Allah S.W.T., for with His blessings this thesis has been successfully completed.

My greatest appreciation goes to my supervisor, Dr. Anitawati Binti Lokman for her guidance and support throughout the period of undertaking this study. I am thankful to all the lecturers of FSKM, UiTM for their continuous support and guidance in completing this study.

I would also like to express my highest gratitude to the Xybase staff for allowing me to conduct my study in allowing me together valuable information from them.

My warmest thank goes to Rosli Ismail, Syazleena Yahya and Zul and to all of my course-mate.

Last but not least, truly deepest appreciation goes to both of my parents, my girlfriend. To all my friends and colleagues of whom without their continuous encouragement and support this thesis could not have been completed.

TABLE OF CONTENTS	iv
LIST OF TABLES	vii
LIST OF FIGURES	viii
CHAPTER 1 INTRODUCTION	1
1.0 Research Overview	1
1.1 Research Background	2
1.2 Problem Statement	4
1.3 Research Objectives	5
1.4 Research Question	5
1.5 Research Scope	5
1.6 Research Significances	6
1.7 Research Limitation	6
1.8 Organization Background	7
1.9 Organization of the Research Chapter	9
CHAPTER 2 LITERATURE REVIEW	10
2.0 System Integration	10
2.1 Importance of System Integration to organization	11
2.2 System Integration Era	12
2.3 System Integration Architecture	14
2.3.1 Point to Point Architecture	14
2.3.2 Enterprise Application Integration (EAI)	14
2.4 Middleware	16
2.5 Simple Object Access Protocol (SOAP)	17
2.6 Service Oriented Architecture (SOA)	18

2.7	Legacy system	19
2.8	Legacy System Integration	20
2.9	Commercial-Off-The-Shelf(COTS)	21
2.10	Organization outsourcing of Information System	22
	2.10.1 Advantages of outsourcing for organization	23
	2.10.2 Disadvantages of outsourcing	24
2.11	Issues in System Integration	24
 CHAPTER 3 METHODOLOGY		 28
3.0	Introduction	28
3.1	Positivism	28
3.2	Hermeneutic	29
3.3	Research Strategy	30
3.4	Qualitative Research	30
3.5	Data Collection Techniques	31
	3.5.1 Semi-structure Interviews	33
3.6	Research Design	34
3.7	Interviewee Profile	36
3.8	Data Types	37
3.9	Research Instrument	38
3.10	Case Study	39
3.11	Method Critique	40
	3.11.1 Reliability	40
	3.11.2 Validity	40
3.12	Permission to proceed	41
3.13	Data Analysis	41
