## ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and the Most Merciful.

Alhamdulillah and thanks to Allah S.W.T for His blessing which enable me to complete my final project.

Upon completion of this project, I would like to express my gratitude to many parties. Thanks a lot to my supervisor Dr. Pn. Wan Adilah Wan Adnan, my very helpful, supportive and dedicated supervisor for all his supervision, comments, ideas, suggestion, comments, ideas, suggestions and guidelines given to me in order to complete this project. Billions thanks for my family especially my parent that gives a lot of courage for me to finish this project.

My special thanks to Nurul Syazwani Adam that contribute she voices in software learning. Also Lastly I would like to thanks to my friends and others people that contribute for this project whether directed or undirected.

## ABSTRACT

Despite human computer interaction have many techniques, only a few focus developing on the metaphor technique for children courseware learning and most the children perceptions of the interface are not considerate from the developer that gives the children difficulties to use software. This project is intent to developed interactive prayer learning for children using metaphor technique that to give better understanding and familiar to children when using the courseware. The objective of studying this is to observe the suitable metaphor for children from books, video learning, article, journal and website that related with the children learning. The observation was analyze according three types of icons were used regarding the text-image, button and navigation. By using metaphor technique it will increase the familiarity with the interface, motivates the user to explore, maintain consistency in interface and help novices to quickly learn how to use this interactive prayer learning.
