LEARNING ARABIC THROUGH MULTIMEDIA

by

JUNAINAH BT MOHAMAD

Thesis is submitted in partial fulfillment

Of the requirement for the degree

Of Bachelor of Science (Hons) (Information Technology)

UNIVERSITITEKNOLOGI MARA

2002

ACKNOWLEDGEMENT

Alhamdulillah. First of all, thanks to Allah for all the Mighty Blessings in granting me the strength and ability to accomplish this thesis project.

In order to complete this project, I have accepted so much help from many people that were involved.

First of all, I would like to thank to my project supervisor, Puan Fauziah Bt Redzuan for her patience, guidance and much-needed assistance. I also want to thank to Puan Mazliana Bt Hasnan who is my first supervisor before she had to move to Terengganu and give her supervision to Puan Fauziah.

I also want to thank to Puan Salamiah Bt Hasan who is the teacher at the TASKI Pendamaran Jaya, Port Klang for her full co-operation to give some information while the interview and survey process are done.

I would also like to express my sincere appreciation to all staffs at the FTMSK and TAR library for their co-operation during the information gathering for this project.

Last but not least, a great accomplishment to all my friends that encourage me in completing this project.

8th April 2002 Junainah Bt Mohamad

ABSTRACT

The existing of new technology makes life become easier. Learning process also has changed to make it easier and interesting. Computer as a tool in education field is become popular technique. This project used the multimedia tools to teach children Arabic language. This project developed to supplement the pre-school curriculum especially Islamic kindergarten that teaches Arabic language as one of their important subject. The target users for this project are for children at ages 4 to 6 years old. This program introduces the student to alphabets, face of human, numbers and colours in Arabic. There are also exercises included to test how far the students understand what are they had learned. The exercise such as completes the Arabic letters, suit the object with the right word, colour the alphabet and read the short sentence. There is also a fiin site where the students can play a simple game as an additional activity. The program is presented in colourful screen include animated picture, movie and sound that will be beneficial to the children to learn this language.
