Universiti Teknologi MARA

Mobile Learning Application for CCNA1 on Android Platform

Azura Md Sari

Thesis submitted in fulfillment of the requirements for Bachelor of Computer Science (Hons) Data Communication and Networking Faculty of Computer and Mathematical Sciences

July 2015

ACKNOWLEDGEMENT

In the name of Allah, the Most Merciful and the Most Compassionate.

Alhamdulillah, praises and thanks to Allah because of His Almighty and His utmost blessings, I was able to finish this research within the time duration given.

First and foremost, my deepest appreciation and gratitude goes to my beloved dedicated supervisor, Dr. Kamaruddin Mamat, for his guidance, encouragement, ideas, tolerance and lots of support that led to the completion of this project. It is such a wonderful gift to have the opportunity to learn and gain experience from such a skilled and experienced supervisor. Thank you to my examiner, Dr Mohamad Yusuf Darus for his guidance and support.

Secondly, I would like to thanks Pn. Siti Arpah for the detailed and constructive comment and valuable advice.

Last but not least, I would like to give my gratitude to my beloved family who gave me an appreciation of learning and taught the value of perseverance and resolve. I also would like to say thank you to my dearest friends for their ideas and knowledge to complete this project and to the entire person that directly or indirectly helped in the project. May Allah S.W.T bless all of you. Jazakallah khair

Thank You.

ABSTRACT

This project is about the development of mobile learning application for CCNA1 on Android platform. The CCNA1 is one of the network subjects that is important to student who studied in CS225, Faculty of Computer & Mathematical Sciences, UiTM Shah Alam. Therefore, the customized mobile application called as MobCCNA-APPS was develop to help the student to do the revision and exercise more flexible, anytime and anywhere. This application enable student to read the material through the smart phone which is contains text, image and video from YouTube. This application also contains quizzes which the student can make it as the intensive exercise. This application was developed by using Hybrid application and only run on Android platform. As the result, development of MobCCNA-APPS can be used by the student for the learning session and the lecturers used the application as one of the tool for teaching aids. The application may be used by those who interested in learning network.
