Thesis submitted in fulfillment of the requirements for

**Bachelor of Science (Hons)
Information System Engineering
Faculty of Computer Science and Mathematics**

MAY 2010

ACKNOWLEDGEMENT

“Bismillahirrahmanirrahim”

I would like to express my appreciation for the helpful guidance provided to all the people who involved in this project whether directly or indirectly.

First and foremost, I would like to address my deepest appreciation and sincere thanks to my dedicated supervisor, Mr. Fauzi bin Mohd Saman, for all his guidance, valuable suggestion, comments, advices, support and concern throughout the completion of this project. Thank you for being so patient in dealing with my problems during the two (2) semesters.

Special thanks also goes to project coordinator, Assoc. Prof Rashidah Bt Rawi and Assoc. Prof Wan Nor Amalina bt Wan Hariri for all the guidance and constant advice concerning the writing of this project report and system progress.

Finally, I wish to thank all those who graciously allowed themselves to be interviewed during the process of the research for my project proposal. Special thanks are due to my precious family who provided excellent advice.

I would like to thanks everyone who has contributed to the completion of this report and the talents and dedication to my entire friends. To all mentioned here, might ALLAH bless you all. Thank you.

ABSTRACT

The use of information and communication technology in education and training has undergone several paradigm shifts over the last three decades. Very recently the notions of *e-learning* (learning supported by digital electronic tools and media) have emerged. Web-based learning are widely used to support a process of teaching and learning. When compared to *CD-ROM learning*, the benefits of Web-based learning is stem from the fact that access to the content is easy and requires no distribution of physical materials. In Malaysia, Science subject has been introduced as early as for the students from standard four in primary school. Science subject for primary school students are tested during the Primary School Evaluation Test (UPSR). Unfortunately, there are some students feel that Science is one of the most difficult subject, by using mastery learning model it can help student to improve and achieve a high degree of learning if 2 conditions are met. First condition is each learner must be given sufficient time to master every learning steps in instructional sequence and the second condition is one children must be given remedial help whenever a step is not mastered. Every topic of syllabus is break into unit and all student can learn a set of reasonable objectives with appropriate and sufficient time to learn. Mastery learning puts the techniques of tutoring and individualized instruction into a group learning situation.

TABLE(S) OF CONTENT

TITLE PAGE.....	i
APPROVAL.....	ii
DECLARATION.....	iii
ACKNOWLEDGEMENT.....	iv
ABSTRACT.....	v
LIST OF FIGURES.....	viii
LIST OF TABLES.....	ix
APPENDICES.....	x
CHAPTER 1: INTRODUCTION	
1.1 Resarch Background.....	1
1.2 Research Problem / Problem Statement.....	2
1.3 Aim of Research.....	3
1.4 Objectives of Research.....	3
1.5 Scope of Research.....	3
1.6 Significance of Research.....	4
1.7 Conclusion.....	4
CHAPTER 2: LITERATURE REVIEW	
2.1 Science Curriculum in Malaysia.....	5
2.2 Mastery Learning Model.....	8
2.2.1 Curriculum.....	11
2.2.2 Instruction.....	11
2.2.3 Assessment.....	11
2.3 E-Tuition Science for UPSR System.....	11
2.3.1 Curriculum.....	14
2.3.2 Instruction.....	14
2.3.3 Assessment.....	14
CHAPTER 3: METHODOLOGY	
3.1 Methodology.....	15
3.1.1 Planning Phase (Problem Identification and Planning Phase)..	16

3.1.2 Requirement and Analysis Phase (requirement Gathering and Requirement Analysis Phase).....	17
3.1.3 Design Phase.....	18
3.1.4 Development Phase.....	19
3.2 Hardware and Software Requirement.....	19
3.2.1 Hardware Requirement.....	20
3.2.2 Software Requirement.....	20
3.3 Research Plan.....	21
3.4 Summary.....	21
CHAPTER 4: ANALYSIS AND FINDING	
4.1 To identify requirements for tuition online.....	22
4.1.1 Interview.....	22
4.2 To gather the information about mastery learning model for tuition online.....	24
4.2.1 Curriculum.....	27
4.2.2 Instruction.....	27
4.2.3 Assessment.....	28
4.3 To design tuition online based on mastery learning model.....	28
4.4 To develop tuition online based on mastery learning model.....	28
4.5 Prototype Screen Shots.....	31
CHAPTER 5: CONCLUSION AND LIMITATION	
5.1 Conclusion.....	35
5.2 Project Limitation.....	36
5.3 Project Recommendation.....	36
5.4 Summary.....	37
