ACKNOWLEDGEMENT

Praise to Allah, the Most Gracious and Most Merciful. Without His guidance and blessings, this thesis would not have been completed.

I would like to express my most sincere appreciation and gratitude to my supervisor, Puan Jamaliah binti Taslim for her counsel, advice, moral support and guidance. Her constant encouragements for new ideas were a source of great inspiration and thanks for trusting me enough to work independently.

I also would like to forward my grateful thanks to Puan Noor Elaiza Binti Abd. Khalid, as my lecturer in Information System Project, for the knowledge given in the class and guidance throughout the completion of the thesis.

Special thanks to Puan Suzianah from Sekolah Menengah Kebangsaan Sultan Salahuddin Abdul Aziz Shah, my external supervisor for helping me in gathering the information for my project.

Last but not least, I would like to extend my deepest appreciation to all my family and friends especially my beloved mother, Puan Zaharah Binti Talib, without whose presence, encouragement and understanding this pursuit would not have been completed.

Thank you.

ABSTRACT

This thesis presents a web-based online registration system development for Sekolah Menengah Kebangsaan Sultan Salahuddin Abdul Aziz Shah, Seksyen 2, Shah Alam (*SMKSSAAS*). The web site contains background of the school, *SMKSSAAS* bulletin board, album gallery, facilities, co-curriculum, online registration form and web administration interface. The main objective of this project is to provide a better service of quality for administration of *SMKSSAAS*, Sekolah Kebangsaan Seksyen 4 and Pejabat Pendidikan Daerah (*PPD*) to easily register form one students for particular semester online and to eliminate redundant data entry of the student's personal detail into the database. Through this system students and parents also will be able to check their registration status online and view update information and latest news about the school. The system provides easier graphical interfaces, which can reduce mistakes while filling the form. It is expected that this system can reduce the time for administrative occurred in the registration process. PHP has been used as the programming language to develop the engine for this system while Macromedia Dreamweaver MX has been used design the interface.

ACKNOWLEDGEMENT	i
ABSTRACT	ii
ABSTRAK	iii
TABLE OF CONTENTS	iv
LIST OF FIGURES	viii
LIST OF ABBREVIATION	x
LIST OF APPENDIXES	xi
CHAPTER 1: INTRODUCTION	1
1.1 Introduction	1
1.2 Background of the problem	2
1.3 Problem Description	3
1.3.1 Application for form one students is time consuming	3
1.3.2 Problems to get latest news about <i>SMKSSAAS</i>	4
1.3.3 Problem in maintaining student's application form	4
1.4 Project Objectives	
1.4.1 To provide an online application form for a better service quality	5
1.4.2 To assist the <i>SMKSSAAS</i> Registrar Unit (Pentadbir Pendaftaran Pelajar)	5
1.4.3 To provide students and parents with detail information and latest news about the school	6
1.5 Project Scope	6

1.6	Project Significance	7
1.6.1	Significance to administrations of Sekolah Kebangsaan Seksyen 4 and the administration of <i>PPD</i>	7
1.6.2	Significance to the student and parents	7
1.6.3	Significance to Internet Users	8
CHAPTER2: LITERATURE REVIEW		9
2.1	Introduction	9
2.2	Detail description of the problem	9
2.3	Definition of pertinent technical terminologies	10
2.3.1	PHP (Hypertext Preprocessor)	10
2.3.2	MySQL Database Server	11
2.3.3	Apache	12
2.3.4	World Wide Web (WWW)	13
2.3.5	HTML (Hypertext Markup Language)	14
2.3.6	Online Registration Form	14
2.3.7	Database Administrator	15
2.4	Different methodology/approach to solve similar problem	15
2.4.1	Active Server Pages (ASP)	15
2.4.2	VbScript	16
2.5	Brief description of all known similar and relevant on-going projects	17
2.5.1	Course Registration via Internet	18
2.5.2	Course Registration via Internet	18
2.5.3	A prototype of an Online Course Registration System	18
2.5.4	Online Registration for An Najah Educare Centre	18
