ABSTRACT

I-LEARN are an online learning management system in order to help UiTM lecturers and students in teaching and learning. I-learn portal is accessible via internet where lecturers can access the system to upload and manage lecture notes and online collaboration with students. Students can also access the system from anywhere and anytime to download lecture notes and collaborate with lecturers and other students through online. This research investigated how lecturers and students of Faculty of Computer and Mathematical Sciences (FSKM), UiTM Shah Alam actually used i-learn. I-learn offers features that support learning and teaching at UiTM. Nevertheless, little is known how i-learn is used in teaching and learning at FSKM. Thus, the objectives of the research are to find out how FSKM lecturers and students use i-learn in teaching and learning at FSKM, followed by to identify i-learn features that are commonly used in teaching and learning at FSKM and finally to identify factors that influence the use of i-learn at FSKM. Opinions and responses have been through evaluation i-learn website and interviews with related persons in order to get the requirements for the research which has been studies and analyzed. The result shown that from 15 feature are available in i-learn, only 7 features are actual used by lecturers and students. The main purpose usage of i-learn are uploading and downloading the lecture materials. The other result will help to enhance teaching and learning at FSKM using i-learn.

ACKNOWLEDGEMENTS

In the name of Allah the most Gracious and the most Merciful

May His Blessing be upon the Prophet Muhammad s.a.w

First of all, I would like to express my deep gratitude to Allah S.W.T. for He has bestowed me with ideas, strength, opportunity and He has opened up some peoples' heart to assist me in my task. Without it, I might be lost until today. I would also like to thank my parents for all the support they have given me.

My gratitude also goes to all individual and group of people that involved directly and indirectly in this thesis especially to my beloved supervisor, Dr. Fariza Hanis Binti Abdul Razak. I am grateful to have her as a supervisor and also as my mentor. Her guidance and supervision will undoubtedly help me in my future undertakings. Besides of that my thankful also goes to Dr. Wan Adilah Binti Wan Adnan, my ITS690 coordinator for giving me all the guidelines in order to complete the thesis. Also special thanks to Madam Jamaliah Binti Taslim, who give me the entire positive comment and advices in order to finish the thesis.

My personal gratitude goes to my family and my friends for all the unceasing moral support and tolerance that they gave me.

Thank you everyone. May God bless all of us.
