**E-COUNSELLING WITH PERSUASIVE DESIGN:  
A PROTOTYPE**

**HAZWANI BTE MOHD MOHADIS**

Thesis submitted in partial fulfilment of the  
requirements for

**Bachelor of Science (Hons) (Netcentric Computing)**  
**Faculty of Computer and Mathematical Sciences**

**MAY 2010**

## **ACKNOWLEDGEMENTS**

“IN THE NAME OF ALLAH, THE MOST GRACIOUS, THE MOST MERCIFUL”

I praised to ALLAH for His blessings and mercy for me, especially for the lasts three years of my life. And by His grace, this research was completed within the stipulated time. Alhamdulillah.

I would hereby wish to express my sincere appreciation and gratitude to my knowledgeable supervisor, Dr. Fariza Hanis Abdul Razak, for her guidance, encouragement and continuous support. This research area of Persuasive Technology was actually very new to me. Nevertheless, her outstanding ideas and encouraging comments have provided a good basis for the present research. Great thanks, Dr.

My sincere thanks are due to my project’s examiner, Madam Nik Mariza Abdull Malik, for her constructive review and valuable comments. Her excellent advices especially during project’s presentation have made a significant improvement for this research project.

I would also like to acknowledge my research coordinator, Encik Adzhar Abd Kadir, for his guidance and positive comments that he gave to me as well.

My deepest appreciation goes to my beloved parents and family members, especially my dearest mother for her incomparable love, continuous moral support, counseling and guidance in ensuring that as learning individual to always do my best and to reap success in spite of all the shortcomings and challenges.

To my mother, I dedicate this research.

## ABSTRACT

E-counselling is an exciting new method of helping people work through life issues. As counselling process mainly aims at changing people's behaviour and thinking, it is vitally important for an e-Counselling website to be highly persuasive. For the purposes of this project, persuasiveness of "e-Kaunseling Pelajar" has been investigated by conducting usability testing. Analysis of usability testing conducted on this website proves that this website is lack of persuasiveness elements which in turn results in less participation. Accordingly, this project aims to develop a prototype of e- Counselling website which utilizes persuasive design techniques.
