

MISI AKADEMIK

Prepared by Enr. Mohammad Sufian Sa'aid

For 2020 September intake, the Faculty of Chemical Engineering aims to attract around 150 new students into its Bachelor degree programme. 'Misi Akademik' of Faculty of Chemical Engineering UiTM Pulau Pinang has participated in several exhibitions showcasing the opportunities for higher degree programmes, especially the Bachelor degree Diploma and STPM (or equivalent) graduates. These exhibitions took place at the matriculation and foundation colleges, as well as roadshow organised by the Ministry of Education Malaysia throughout the final months of 2019 until the first quarter of 2020. In addition, 'Misi Akademik' also received invitation from Matriculation College and university to deliver talk on the Bachelor degree programme offered by the Faculty, as well as online talk which was conducted during 'Move Control Order'.

Volunteers among lecturers had displayed awesome commitment and dedication to promote the Bachelor in Chemical Engineering (Environment) with Honours programme offered by the Faculty of Chemical Engineering UiTM Pulau Pinang to visitors and potential students. Thanks to the participation of active students from the Faculty of Chemical Engineering during these tours, close interaction and engagement with potential students were materialised. An attractive promotional video about the Bachelor in Chemical Engineering (Environment) with Honours programme was created by Mr Mohamed Syazwan Osman and his media team for quick dissemination of the programme info to the potential students.
