NURFARM AGRO

Nurfarm agro is primarily a sheep farm located at the 12th mile Ulu Langat road and is just 30 minutes drive from the KLCC. They was established on 7th April 2007 and it's core activity is goat and sheep rearing. Though sheep rearing is the core business, the farm also produces organic fertilizer, soil mixtures and operates five units of homestay chalets. It is a place to be close to nature and to experience life on the farm. Since they had lack of promotions and less attractive design, i decided to rebrand this service. This is to promote the farm and to get people to recognize Nurfarm Agro as one of the best organic farm in town,
