ACKNOWLEDGEMENT

"In the name of ALLAH S. W. T. the Most Beneficent and Most Merciful"

Alhamdulillah, with all the greatest gratitude and appreciation to dear God, ALLAH Almighty, I am really grateful to Allah S.W.T for giving me strength, idea and opportunity to complete my final year project as a fulfillment of the requirements for the course CSP 650 (Project). I would like to acknowledge people who are involved in giving helps, idea and supports throughout my research.

First of all, I want to express my sincere appreciation to my supervisor Dr. Fariza Hanis Abd Razak for her advices, support, willingness and patience in helping me to complete my thesis. I also want to thanks my lecturers who have teach CSP 600 (Project Formulation) and CSP 650 (Project) for her help and guidance, Dr Emma Nuraihan Mior Ibrahim. Not forgetting, I also would like to express my thanks to Senior Executive Officer at Academic Affairs Division (HEA) in Faculty of Computer and Mathematical Sciences, Cik Zuraiti Ab Razak who had spent her time to give me information for my thesis.

I also would like to express my thankful to my family for their support during my hard times especially while I'm completing this thesis and always pray for my success. I also want to thanks my friends for their help and encouragement for me to complete this thesis.

Last but not least, thanks also to all that are not listed above for their help, support and encourage me until this thesis completed. Thanks to all of you.

ABSTRACT

Approval Letter Application System (ALAS) is a development of approval letter system which will be used by the student at Faculty of Computer and Mathematical Sciences (FSKM) to get the approval letter from the FSKM's Academic Affairs Division. The used of approval letter is to approve the student's status or to get the permission from other company to have an interview session. The increasing amount of fresh and previous student in FSKM will also affect the amount of student data need to be kept. This situation have force them to have a web based system that will help them to keep track on student data and print the letter at the same' time. Different with the manual system, this proposes system will help the staff to manage the student's data and reduce the waiting time for the approval letter from the FSKM's Academic Affairs Division. Therefore this research is to propose the system that can be use by the student and HEA's staff by using the Web Information System Development Methodology (WISDM). The aim is to develop the prototype of Approval Letter Application System (ALAS) for FSKM UiTM, Shah Alam. The objectives of the project are to identify the requirement of the ALAS prototype, design the prototype and develop the prototype of the system. The scope of this project is within the Academic Affairs Division and students in the FSKM. This project follows several stages in research approach and methodology according to the SDLC phase. All this phases or stages will be going through in details in order to achieve the objectives of the proposed system prototype. The development of this research project will be based on requirement gather and analyzed to deliver the proposed project

TABLE OF CONTENT

DECLARATION	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
TABLE OF CONTENT	v
LIST OF FIGURE	viii
LIST OF TABLE	ix
CHAPTER 1 : INTRODUCTION	1
1.0 Research Background	1
1.1 Problem Statement	3
1.2 Research Aim	5
1.3 Research Question	5
1.4 Research Objective	5
1.5 Research Scope	5
1.6 Research Significant	6
1.7 Research Design	7
1.8 Summary of this Chapter	8
CHAPTER 2: LITERATURE REVIEW	9
2.1 Information System	9
2.2 Web-based Information System	10

2.3	Web Information System Development Methodology	11
2.3.1	Overview Web Information System Development Methodology	11
2.3.2	What is Web IS Development Methodology	12
2.3.3	The Multiview Approach	14
2.3.4	The WISDM Matrix	16
	2.3.4.1 Organizational Analysis	17
	2.3.4.2 Informational Analysis	17
	2.3.4.3 Work Design	18
	2.3.4.4 Technical Design	21
	2.3.4.5 Human-Computer Interface	21
2.4	Summary of this Chapter	22
 CHAPTER 3: RESEARCH APPROACH AND METHODOLOGY		23
3.1	Introduction	23
3.2	Problem Identification and Planning	25
3.3	Requirement Gathering	26
	3.3.1 Primary Data Collection	26
	3.3.2 Secondary Data Collection	27
3.4	Requirement Analysis	27
3.5	Design	28
3.6	Development	29
3.7	Summary of this Chapter	30
