ACKNOWLEDGEMENT

All praise to the Al-Mighty Allah, the most merciful for giving me the strength and patience in completing this Industrial Training Project Report. I would love to thanks to all parties involved during my industrial training at Pejabat Tanah Dan Jajahan Pasir Puteh especially to Puan Noor Rahmawati Binti Alias for giving guidelines throughout to complete this project and complete my academic writing. Also for my supervisor, Encik Mohd Za'im Bin Safei for giving me a lot of guidance and encouragement for me to successfully complete my project and to staff that give me a lot of information that I need to develop the "Sistem Inventory PTJPP".

I would also to thanks to my family for giving me support and my friends for supporting and sharing information. Finally, I hope my project can fulfill the requirements of the faculty and industry and hopefully this assignment is able to help us to understand more on the information system development. So, thank you very much for all who is helping me to accomplish this Industrial Training Project.

Thank you...

Abstract: *This paper discusses the information system development for Pejabat Tanah Dan Jajahan Pasir Puteh (PTJPP) to manage the inventory system as well as to solve the problems arising from the use of manual system. The inventory system has been named as "Sistem Inventory PTJPP" and the function of the system is to manage the inventory system that manages the booking approval of the items made by the staffs and management the movement of inventory equipment. This system was provided with user-friendly menu and interface design and also easy to be used by PTJPP staff. The "Sistem Inventory PTJPP" was developed in stages and has been following all SDLC process as well as used PHP language as source code, text, graphic and animation designs. To create the system database for saving and retrieving the related data, MySQL was used. The benefit of the system is to solve the problem faced by PTJPP in managing inventory system through the manual process used before. The process of the storing, managing, searching, and retrieving the information of inventory become easily, quickly and securely by using the "Sistem Inventory PTJPP".*
