

**MEASURED AND SIMULATION PERFORMANCE
OF A WIRELESS LAN IEEE 802.11b**

by

Shahrina binti Shaharin

A project report submitted in partial fulfillment
of the requirements for the degree of

*Bachelor Degree (Hons.) In Electrical
Engineering*

October 2003

SHAHRINA BINTI SHAHARIN
**Bachelor Degree (Hons.) In Electrical
Engineering**
University Of Technology Mara
40450 Shah Alam
Selangor Darul Ehsan

ACKNOWLEDGMENTS

*In the name of Allah SWT,
Most Gracious, Most Merciful.*

Alhamdulillah, with His permission, this research was completed on time without any uncomfortable occurrence.

The author would like to express his greatest appreciation to those who had sincerely helped without hesitation to make this research a possible success. A very special thanks to Prof Madya Dr Mohd Dani Baba, Lecturer in Faculty of Electrical Engineering cum the supervisor to this project paper who had throughout this semester sincerely advised and guided her including providing assistance towards completing this proposal.

This appreciation also includes the group members, which is also doing their studies and research on wireless networking; the final semester degree students and the all the undergraduate students that is also under Prof Madya Dr Mohd Dani Baba's supervision. Appreciation and thanks for all their support and supervision in completing the research studies. Their thorough knowledge and advice helped my understanding on the subject given. Also not forgetting all technicians of communication laboratory

ABSTRACT

Wireless technology is the method of delivering data from one point to another without using physical wires, and includes radio, cellular, infrared, and satellite. Wireless LANs offers more than just flexibility and mobility, the benefits of wireless networking is unquestionable. Implementing wireless network gains in process efficiency, accuracy and lower business costs.

In this project report, the main discussion focused on deployment of infrastructure basic service set of the wireless LAN architecture. Networking in experimented in two methods. Virtual networking is done through modeling in a Virtual Network Environment (VNE) called OPNET Modeler. In actual deployment approach Access Points (APs) are set up by the user themselves. This project report introduces WLAN architecture and layers in general towards understanding how and what determines the performance of the most deployed standard today IEEE 802.11.

CHAPTER		PAGE
	DECLARATION	i
	ACKNOWLEDGMENTS	ii
	ABSTRACT	iv
	LIST OF ABBREVIATION	v
	TABLE OF CONTENTS	viii
	LIST OF FIGURES	xii
	LIST OF TABLES	xv
1	INTRODUCTION	2
	1.1 Introduction	2
	1.2 Background Study	2
	1.3 Objectives	3
	1.4 Project Overview.....	3
2	WIRELESS LAN	6
	2.1 Introduction	6
	2.2 Benefits Of Wireless Networking.....	7
	2.2.1 Mobility And Process Efficiency	8
	2.2.2 Installation In Difficult-To-Wire Areas	8
	2.2.3 Increased Reliability	8
	2.2.4 Reduced Installation Time	9
	2.2.5 Long Term Cost Savings	9
	2.3 Wireless LAN Technologies.....	9
	2.3.1 Bluetooth	9
	2.3.2 HomeRF	11

	2.3.3 High Performance Radio LAN	12
	2.4 Wireless LAN Architecture	13
3	IEEE 802.11	16
	3.1 Understanding Wireless LAN.....	16
	3.1.1 Layer 1: The Physical Layer	17
	3.1.2 Layer 2: The Data-Link Layer	18
	3.1.3 Layer 3: The Network Layer	19
	3.1.4 Layer 4: The Transport Layer	19
	3.1.5 Layer 5: The Session Layer	20
	3.1.6 Layer 6: The Presentation Layer	21
	3.1.7 Layer 7: The Application Layer	22
	3.2 IEEE 802 LAN Standards Family	22
	3.3 IEEE 802.2 LLC Overview	23
	3.4 IEEE 802.2 LLC Services.....	25
	3.4.1 Unacknowledged Connectionless Service	27
	3.4.2 Connection Oriented Service	28
	3.4.3 Acknowledged Connectionless Service	32
	3.5 LLC/MAC Layer Service Primitives.....	32
	3.6 Introduction To The IEEE 802.11 Standard.....	33
	3.7 802.11 ARCHITECTURE.....	36
	3.7.1 Frequency Hopping Spread Spectrum (FHSS)	36
	3.7.2 Direct Sequence Spread Spectrum (DSSS)	39
	3.7.3 Infrared (IR)	40
	3.7.4 802.11 Medium Access Control (MAC)	41
	3.8 IEEE 802.11 Topology	45
	3.8.1 Independent BSS (IBSS) Networks	45
	3.8.2 Extended Service Set (ESS) Networks	47
4	WIRELESS NETWORK REQUIREMENT	51
