WELCOME MESSAGE

Assalamualaikum wbkt and Salam One Malaysia

First of all, I would like to congratulate the Research, Industrial Linkages and Alumni Melaka for yet another successful organization of the Research, Invention, Innovation and Design (RIID) exhibition 2012.

This competition and exhibition is the fourth effort by the Research, Industrial Linkages and Alumni in exhibiting the outcomes of research, invention and innovation by our own versatile lecturers and students and also participation from other IPTAs, IPTS and Schools. I believe that this exhibition is definitely a good avenue for them to participate actively and progress collaboratively in the field of innovation and research.

I am confident that the Research, Industrial Linkages and Alumni in the Melaka campus will continue to address the various challenges that we are constantly facing with a view towards multidisciplinary solutions. Hence, the present exhibition with the theme 'Innovation for Sustainable Growth' is appropriate, and I am certain that this exhibition will bring about more collaborative research and publication.

I therefore would like to take this opportunity to extend a big 'Thank you' to the organizing committee of Research, Invention, Innovation and Design (RIID) 2012 and each and everyone who has made this exhibition a reality. I wish all researchers, lecturers and students a meaningful and enriching experience in coming up with new and innovative inventions. I wish to end with a note of thanks to the Research, Industrial Linkages and Alumni for a job well done.

Yours sincerely,
Y.Bhg.Prof Madya Dr Mohd Adnan Hashim

BACKGROUND OF PENYELIDIKAN, JARINGAN INDUSTRI & ALUMNI (PJI&A)

PJI&A established in April 1980, started as the Research Management Unit (RMU) or IRDC and was formerly known as the Planning, Research and Development Centre. However in September 1987, IRDC was restructured with its heightened importance in research and consultation in UiTM and was divided into two units, Research and Consultancy Centre (RACC) and Planning and Evaluation Unit. This centre was then renamed Research and Consultancy Bureau in 1994 and on 15 July 2003 it became Institute of Research, Development and Commercialisation (IRDC).

With the mooting of the Deputy Vice Chancellor in March 2008 to take over the intellectual property and commercialisation portfolio, IRDC was given the responsibility to maximise innovation and increase the number of research which will later be published in high impact journals. Ensuing this, on 31 July 2008 IRDC became the Research Management Institute (RMI) to synchronise with UiTM's aspiration to become a Research University that will develop innovation activities and new research. In branch campuses RMI is known as RMU. The department of PJI was officially established in 2009 headed by its Deputy Director, Associate Professor Dr. Roaimah Omar. Under her guidance, Invention, Innovation and Design (IID) started with the RIID showcase in August 2009 and this was followed by the first IID exhibition and competition in October 2009.

PJI&A is mainly responsible to manage, monitor and facilitate researchers in conducting their research in the area of science and technology, management and social sciences. It also provides consultation services to researchers and assisting them in their research claims. PJI&A also conducts seminars and workshops to encourage, motivate and train the academic and non-academic staff in research and consultation, securing research grants and projects, to manage good financing and also manages entrepreneurial and alumni activities.

Objectives

- To promote word-class research.
- To administer, coordinate and provide service for research development, consultation and research publications.
- To provide assistance in exploring new subjects and identify niche area of interest.
- To disseminate information and provide ample training in research, consultation and publication of research.
- To disseminate information and provide ample training in research, consultation and publication of research.
- To provide related service through the latest technology.
- To assist in research publications for high impact journals.

Vision

- To become the leading administrative centre for research, development, consultation and world-class research publication.

Mission

- To enrich the academia, creative ability and innovation through quality service.

INTRODUCTION TO RIID 2012

Innovation activities can be considered as an important mechanism for the nation's progress. RIID2012 Melaka anchors on the objective to produce individuals who are capable of formulating creative ideas and be highly competitive. UiTM is an institution which primarily puts emphasis on an innovative culture among its staff and students to form a critical thinking society, possessing creativity skills and elevated knowledge. Aligned with the government's aspiration to cultivate innovation, UiTM Melaka has taken the initiative to organise RIID2012 Melaka Innovation Festival.

To raise the status of local universities globally or among the KPI which has been determined by the Ministry of Higher Education (MoHE) and to achieve the status of Research University, the total number of innovation being produced by a university is of utmost importance. Innovation is a vital catalyst to attain the status of a developed nation in the year 2020. Parallel to this, UiTM Melaka is carrying the nation's aspiration through innovation programmes wherein the staff and students' creativity and innovative abilities could be brought to greater heights through competitions and innovation exhibitions held every year.

To consistently produce innovation, IID competitions can act as one of the ideal channels or medium to ensure students, lecturers, administrative officers and the public to exhibit or display their products or prototype as well as new ideas that contain commercial values. The first IID held at UiTM Melaka level took place in 2009. It successfully exhibited more than 37 products. To continue the innovation culture within the campus community, IID competitions should be maintained.

The number of participation showed an encouraging response with 45 products being exhibited in the following year. The third IID known as DERIA 2011 was given a new facelift with an estimation of nearly 100 products that competed. Therefore, the Research, Industrial Linkages and Alumni Division (PJI&A) suggested organising the 4th IID in 2012. The IID competition this year is known as RIID2012 with the theme 'Innovation for Sustainable Growth'. The theme is chosen as innovation is believed to be the main impetus for growth that would spearhead the nation towards becoming a high income developed nation.

Therefore, the Research, Industrial Linkages and Alumni Division (PJI&A) has suggested to organise the 4th IID in 2012. The IID competition this year is known as RIID2012 with the theme '*Innovation for sustainable growth*'.

184. *Eksperimentasi Penghasilan Seni Ball Felt Menggunakan Bulu Kambing Biri-Biri Tempatan (Kelantan)*

Fakulti Seni Lukis & Senireka
UiTM Machang Kelantan

Abstract

Felt adalah sejenis tekstil yang hanya memerlukan haba dan tekanan untuk dijadikan sehelai fabrik. Felt merupakan antara hasil tekstil tertua yang pernah dicipta di mana ia tidak langsung menggunakan sebarang mesin tenun. Tekstil felt dipercayai wujud semenjak 6500SM di Siberia, di mana fabrik jenis ini dijadikan kain kafan. Negara Barat terutamanya negara yang beriklim sejuk biasanya menggunakan fabrik jenis ini untuk memerangkap haba. Selain dijadikan sebagai bahan utama di dalam penghasilan pakaian, ia juga digunakan dalam penghasilan kraf, barang keperluan rumah malah berpotensi untuk digunakan dalam pelbagai jenis industri. Penggunaan bulu kambing biri-biri dalam penghasilan felt di negara Barat merupakan perkara biasa dan ia senang didapati di kedai-kedai kraf. Dengan mengaplikasikan kaedah experimental research bulu kambing biri-biri ini diproses mengikut kaedah sebagaimana yang diamalkan di negara luar; contoh: negara Barat. Bagi mendapatkan keputusan yang terbaik beberapa siri eksperimen telah dijalankan bagi menghasilkan jenis-jenis seni Felt seperti Ball Felt dan Flat Felt. Hasil dari eksperimen ini didapati bulu kambing biri-biri tempatan ini mempunyai potensi yang besar untuk dijadikan seni Felt walaupun kualitinya tidak 100% dengan bulu kambing biri-biri dari negara luar. Malahan penyelidikan ini telah membuktikan bahawa kambing biri-biri tempatan ini juga setanding dengan bulu kambing biri-biri dari negara luar. Penyelidikan ini juga ingin menyampaikan mesej tentang kepentingan kitar semula kepada negara. Melaluinya ia mampu menjana pendapatan tambahan kepada penduduk yang telibat memandangkan kosnya yang sangat minimum.

Abstract

Newspaper articles that quoted from the Berita Harian dated 18 April 2000, the practice of unhealthy lifestyle among the people of this country is the cause why Malaysia is categorized as a country that had higher obesity rates than other countries in the region. The contributors of obesity are overeating, high-calorie foods and eating late at night. Malaysians are well known for their habit of eating late at night and most of the time they will spent enjoying a high-calorie food. Various preventive efforts has been taken by Ministry of Health, Malaysia. However, this problem still persists. Therefore, the purpose of this research is to help obese people to eat healthily. Two research methods are employed, the interview for the daily menu of the obese subjects and the questionnaire to identify the effectiveness of photographic poster in order to change the unhealthy eating habits among them. As a result, the researcher found that the poster has changed obese people's thought in adopting a healthy diet compared to their previous dietary habits.
