ACKNOWLEDGEMENTS

"Bismffiahirrahmanirahim..."

Alhamdulillah..., praise to Allah that gave bless, strength and courage for me to complete this project paper. Without it I would have never been able to complete this project.

I wish to express my heartiest gratitude and appreciation to my supervisors Puan Kamariah Ismail and Ir. Muhammad Ibrahim for her tremendous guidance and dedication during the preparation of this industrial project. Their continuous encouragement, support and supervision could never slip off my mind.

I would also wish to express my appreciation and thanks to all staffs and officers of libraries at Universiti Putra Malaysia, Universiti Kebangsaan Malaysia, Universiti Malaya and not forgetting Universiti Teknologi Mara for assistance and cooperation.

To my family...Bonda, Ayahnda and all my brothers and sisters...there are no words that could describe my feeling to all of you. Thank you for everything that you have given to me.. .hopefully I could pay off a bit of it with my scroll.

Finally yet importantly, very special thank to all of my friends including those at Flash ActionScripts Organization Society (ActionScript.Org) for helping me out during completing this project.

ABSTRACT

This thesis highlights some basic guidelines of procedures as well as modelled signalling protocols used in modern private network digital telecommunication especially in Private Automatic Branch Exchange (PABX).

This project is intended to demonstrate how a call connection is made using a telephone terminal through PABX (Inter-PABX) and Local Exchange.

The demonstration was designed and developed by using a concept of electronic learning (e-learning). That means developing an interactive with fill multimedia contents.

TABLE OF CONTENTS

CHAPTER		PAGE
1	INTRODUCTION	
	1.1 Introduction	1
	1.2 Project Objectives	1
	1.3 Project Scope	2
	1.4 Project Implementation	3
	1.5 Methodology	4
	1.6 Terminology	4
	1.7 Specifications	5
	1.8 Organisation Of This Thesis	5
2	PRIVATE NETWORKS	
	2.1 Overview	7
	2.1.1 General	7
	2.1.2 Signalling	8
	2.1.2.1 Inter-PABX	8
	2.2 PSS1 (QSIG) - General	9
	2.2.1 Introduction	9
	2.2.2 Architecture	10
	2.2.2.1 PSS1 Layer 1-Physical	11
	2.2.2.2 PSS1 Layer 2-Data Link	11
	2.2.2.3 PSS1 Layer 3-Protocol Control	12
	2.2.3 Primitives	13
	2.2.4 Services	14
	2.3 PSS1 Basic Call Procedures	14
	2.4 PSS1 Supplementary Services	16
	2.4.1 Call-Related Supplementary Services	16
	2.4.2 Active Call Supplementary Services	17

2.4.3	Call-Independent Supplementary Services	18
2.5	PSS1 Message Format	19
3	PROCEDURES AND SIGNALLING	
3.1	Inter-PABX Signalling	20
3.1.1	Introduction	20
3.1.2	Private Network	20
3.1.3	Formats	20
3.1.4	Procedures	22
3.1.4.1	Basic Call	22
3.1.4.2	Supplementary Services	23
3.2	PABX Signalling	25
3.3	PABX and Local Exchange Signalling	25
3.3.1	Basic Call Procedures	25
3.3.2	Basic Call Release Procedures	26
3.4	Telephone and Keypad Technology	27
3.4.1	Introduction	27
3.4.2	Dual Tones Multi Frequency Dialling	28
3.5	Conclusion	29
3.6	Chapter Summary	29
3.6.1	Meeting the Requirements	29
3.6.2	PSS1 (QSIG)	30
4	DEMONSTRATION DEVELOPMENT	
4.1	Macromedia Flash 5 Program Overview	32
4.1.1	Workflow	32
4.1.2	Shared Libraries	32
4.1.3	Macromedia Dashboard	33
4.1.4	Custom Shortcut Keys	33
4.1.5	Support For Importing Mp3 Sound Files	33
4.1.6	Interactivity Expanded Actionscripts	33
4.1.7	Action Panel	34
4.1.8	Smart Clips	35
4.1.9	Movie Explorer	35
