WELCOME MESSAGE

Assalamualaikum wbkt and Salam One Malaysia

First of all, I would like to congratulate the Research, Industrial Linkages and Alumni Melaka for yet another successful organization of the Research, Invention, Innovation and Design (RIID) exhibition 2012.

This competition and exhibition is the fourth effort by the Research, Industrial Linkages and Alumni in exhibiting the outcomes of research, invention and innovation by our own versatile lecturers and students and also participation from other IPTAs, IPTS and Schools. I believe that this exhibition is definitely a good avenue for them to participate actively and progress collaboratively in the field of innovation and research.

I am confident that the Research, Industrial Linkages and Alumni in the Melaka campus will continue to address the various challenges that we are constantly facing with a view towards multidisciplinary solutions. Hence, the present exhibition with the theme 'Innovation for Sustainable Growth' is appropriate, and I am certain that this exhibition will bring about more collaborative research and publication.

I therefore would like to take this opportunity to extend a big 'Thank you' to the organizing committee of Research, Invention, Innovation and Design (RIID) 2012 and each and everyone who has made this exhibition a reality. I wish all researchers, lecturers and students a meaningful and enriching experience in coming up with new and innovative inventions. I wish to end with a note of thanks to the Research, Industrial Linkages and Alumni for a job well done.

Yours sincerely,
Y.Bhg.Prof Madya Dr Mohd Adnan Hashim

BACKGROUND OF PENYELIDIKAN, JARINGAN INDUSTRI & ALUMNI (PJI&A)

PJI&A established in April 1980, started as the Research Management Unit (RMU) or IRDC and was formerly known as the Planning, Research and Development Centre. However in September 1987, IRDC was restructured with its heightened importance in research and consultation in UiTM and was divided into two units, Research and Consultancy Centre (RACC) and Planning and Evaluation Unit. This centre was then renamed Research and Consultancy Bureau in 1994 and on 15 July 2003 it became Institute of Research, Development and Commercialisation (IRDC).

With the mooting of the Deputy Vice Chancellor in March 2008 to take over the intellectual property and commercialisation portfolio, IRDC was given the responsibility to maximise innovation and increase the number of research which will later be published in high impact journals. Ensuing this, on 31 July 2008 IRDC became the Research Management Institute (RMI) to synchronise with UiTM's aspiration to become a Research University that will develop innovation activities and new research. In branch campuses RMI is known as RMU. The department of PJI was officially established in 2009 headed by its Deputy Director, Associate Professor Dr. Roaimah Omar. Under her guidance, Invention, Innovation and Design (IID) started with the RIID showcase in August 2009 and this was followed by the first IID exhibition and competition in October 2009.

PJI&A is mainly responsible to manage, monitor and facilitate researchers in conducting their research in the area of science and technology, management and social sciences. It also provides consultation services to researchers and assisting them in their research claims. PJI&A also conducts seminars and workshops to encourage, motivate and train the academic and non-academic staff in research and consultation, securing research grants and projects, to manage good financing and also manages entrepreneurial and alumni activities.

Objectives

- To promote word-class research.
- To administer, coordinate and provide service for research development, consultation and research publications.
- To provide assistance in exploring new subjects and identify niche area of interest.
- To disseminate information and provide ample training in research, consultation and publication of research.
- To disseminate information and provide ample training in research, consultation and publication of research.
- To provide related service through the latest technology.
- To assist in research publications for high impact journals.

Vision

- To become the leading administrative centre for research, development, consultation and world-class research publication.

Mission

- To enrich the academia, creative ability and innovation through quality service.

INTRODUCTION TO RIID 2012

Innovation activities can be considered as an important mechanism for the nation's progress. RIID2012 Melaka anchors on the objective to produce individuals who are capable of formulating creative ideas and be highly competitive. UiTM is an institution which primarily puts emphasis on an innovative culture among its staff and students to form a critical thinking society, possessing creativity skills and elevated knowledge. Aligned with the government's aspiration to cultivate innovation, UiTM Melaka has taken the initiative to organise RIID2012 Melaka Innovation Festival.

To raise the status of local universities globally or among the KPI which has been determined by the Ministry of Higher Education (MoHE) and to achieve the status of Research University, the total number of innovation being produced by a university is of utmost importance. Innovation is a vital catalyst to attain the status of a developed nation in the year 2020. Parallel to this, UiTM Melaka is carrying the nation's aspiration through innovation programmes wherein the staff and students' creativity and innovative abilities could be brought to greater heights through competitions and innovation exhibitions held every year.

To consistently produce innovation, IID competitions can act as one of the ideal channels or medium to ensure students, lecturers, administrative officers and the public to exhibit or display their products or prototype as well as new ideas that contain commercial values. The first IID held at UiTM Melaka level took place in 2009. It successfully exhibited more than 37 products. To continue the innovation culture within the campus community, IID competitions should be maintained.

The number of participation showed an encouraging response with 45 products being exhibited in the following year. The third IID known as DERIA 2011 was given a new facelift with an estimation of nearly 100 products that competed. Therefore, the Research, Industrial Linkages and Alumni Division (PJI&A) suggested organising the 4th IID in 2012. The IID competition this year is known as RIID2012 with the theme 'Innovation for Sustainable Growth'. The theme is chosen as innovation is believed to be the main impetus for growth that would spearhead the nation towards becoming a high income developed nation.

Therefore, the Research, Industrial Linkages and Alumni Division (PJI&A) has suggested to organise the 4th IID in 2012. The IID competition this year is known as RIID2012 with the theme '*Innovation for sustainable growth*'.

9. Experimental Library System (ELS)

Fakulti Pengurusan Maklumat
UiTM Puncak Perdana

Adib Nazribin Husaini, Muhd Asyraf bin Zainal, Shahrizal bin Saharudin, Muhammad Zulhilmi bin Mohd Ideris, Ahmad Rasyid Harith bin Dzutkifti, Arif Zahirudin bin Burhanuddin & Haslinda Bt. Husaini

Abstract

Nama projek ini adalah "Experimental Library System" (ELS). Projek ini merupakan satu sistem kad pintar'all- in-one' bagi menguruskan pengopemsian di beberapa unit perkhidmatan di perpustakaan seperti unit Sirkulasi, Perkhidmatan Percetakan dan unit Teknologi Maklumat. Sistem ini direka cipta atas tuiuan untuk membantu proses pengoperasian yang lebih teratur bagi kerja-kerja pengurusan pusat sumber sekolah. Sasaran pengguna bagi sistem ini adalah Pusat Sumber Sekolah. Guru-guru pusat sumber akan dapat pelbagai manfaat daripada pengaplikasian sistem ini. Sebagai contoh, mereka dapat menyimpan data pengguna staf dengan cara yang lebih teratur menggunakan pengkalan data yang stabil dan selamat. Sistem ini juga boleh di integrasikan dengan sistem perpustakaan yang lain. Secara keseluruhan, sistem ini mempunyai potensi pasaran yang cerah kerana kebanyakan sekolah-sekolah di Malaysia masih kekal menggunakan kaedah tradisional bagi mentadbir dan menguruskan pusat sumber mereka. Sistem ini juga boleh dinaiktaraf dengan beberapa modul-modul tambahan bergantung kepada permintaan dari semasa ke semasa.

10. Gearing System of a Weaving Loom

Fakulti Sains Gunaan

Abstract

In weaving technology, loom or weaving machine is invented to aid the process of manufacturing woven fabric. There are 3 primary motions involved in loom; namely shedding, picking and beating. These motions are governed by gearing system. It was a great challenge to understand the loom gearing system without a tool to simulate the function. Furthermore, in a real loom this part is normally covered for safety purposes. Thus, this portable scale down sized loom is created as one of the teaching and learning tool in class to assist in understanding of the gearing system. The system comprises of three shafts; crank, bottom and tappet, where every shaft is responsible for the primary motions stated earlier. Via this invention, it is hoped that students now could have better opportunity and space to explore what the loom has offered.
