**Dietary Food Recommendation Using Case- Based  
Reasoning Technique**

**Sitee Noorain Zakaria**

**Thesis submitted in fulfilment of the requirement for Bachelor of  
Computer Science (Hons.) Faculty of Computer and Mathematical  
Sciences**

**January 2017**

## **ACKNOWLEDGEMENT**

Alhamdulillah, praise to the Almighty and His utmost blessing for giving me such an honour opportunity for me to come up with the Dietary Food Recommendation using Case- based Reasoning Technique. The system is one of the conditions for me to graduate my degree in Bachelor of Computer Science (Hons).

First of all, I would like to give my deep gratitude to my supervisor, Engku Zain Engku Azam for supervising me and give a valuable guidance throughout the project completion. A special thank you and appreciation to my lecturer of Project Formulation (CSP600) and Project (CSP650) Dr. Hamidah Jantan.

Above ground, I am indebted to my family whose value to me only grows with age. Finally, I acknowledge my friends, my classmates who helping in me in giving support and boost my spirit as well as encourage me to complete this project.

## ABSTRACT

Hyperlipidemia is one of the diseases that increase the risk of cardiovascular disease. To overcome the risk of the disease, a proper diet and exercise should be followed. The patients need to consult with the dietitian on the proper diet and recommendation so that the patient follows the right plan. But then, the problem troubles the patients as patients need to consult with the dietitian before taking the meals. Dietary Food Recommendation is an application that aims to recommend and help the Hyperlipidemia patient with the right dietary food according to the total calories of the patients based on Body Mass Index (BMI). The project uses Case- based reasoning technique to suggest a diet plans taken from the existing cases in the system. The patients requirements needed to be matched with the cases and then, the matched cases will be selected to be recommended to the patients. The recommendation consists of dietary meals for the patients for breakfast, lunch and dinner menus as well as the total calories for each meal. The result of the project shows that 7 out of 10 cases recommended by the system are similar to the recommendation by the dietitian using the reliability test. Therefore, the system is reliable to be used by the Hyperlipidemia patients. For the future work, the application should be able to recommend a variety of meals for Hyperlipidemia diet plan.

<b>CONTENT</b>	<b>PAGE</b>
<b>SUPERVISOR APPROVAL</b>	ii
<b>STUDENT DECLARATION</b>	iii
<b>ACKNOWLEDGEMENT</b>	iv
<b>ABSTRACT</b>	v
<b>TABLE OF CONTENTS</b>	vi
<b>LIST OF FIGURES</b>	ix
<b>LIST OF TABLES</b>	x
<b>CHAPTER ONE: INTRODUCTION</b>	1
1.1    Background of Study	1
1.2    Problem Statement	3
1.3    Project Objective	3
1.4    Project Scope	4
1.5    Project Significance	4
1.6    Research Methodology Framework	5
1.7    Summary	6
<b>CHAPTER TWO: LITERATURE REVIEW</b>	7
2.1    Hyperlipidemia	7
2.1.1    Overview	7
2.1.2    Type of Hyperlipidemia	9
2.2    Technique	9
2.2.1    Artificial Intelligence (AI)	9
2.2.2    Case- Based Reasoning Technique	10
2.2.3    Data	10

2.3	Dietary Food Recommendation System	12
2.4	Related Work	16
2.4.1	Related work based on domain area	16
2.4.2	Related work based on technique	18
2.5	Conclusion	20
<b>CHAPTER THREE: METHODOLOGY</b>		<b>21</b>
3.1	Methodology Framework	21
3.1.1	Detail Project Framework	22
3.2	Analysis Phase	28
3.2.1	Hardware Requirement	28
3.2.2	Software Requirement	28
3.3	Design Phase and Implementation	28
3.3.1	Data Representation	29
3.3.2	Technique	29
3.4	Result Analysis	30
3.4.1	Reliability Test	31
3.5	Gantt Chart	31
3.6	Conclusion	32
<b>CHAPTER FOUR: RESULTS AND DISCUSSION</b>		<b>33</b>
4.1	Overview of DiFoCBR Framework	33
4.2	Process Flow	34
4.2.1	Data Representation	35
4.3	Implementation Result	35
4.3.1	Retrieve the case	35
4.3.2	Reuse the case	37
4.3.3	Revise the Case	38
4.3.4	Retain the Case	38
4.4	Result Evaluation	39
4.4.1	Evaluation Analysis	39
4.4.2	Discussion	40
