DEVELOPMENT OF SPEECH RECOGNITION USING MATLAB

Project report is presented in partial fulfillment for the award of the Barchelor of Electrical Engineering (Honours) (Instrumentation) UNIVERSITI TEKNOLOGI MARA

TUAN IDA SYARMILA BT TUAN MUSTAFA Faculty of Electrical Engineering UNIVERSITI TEKNOLOGI MARA 40450 SHAH ALAM, SELANGOR

ACKNOWLEDGEMENT

I would like to express my deepest gratitude to my project supervisor, Pn. Kamariah Ismail who deserves most credit for her continuous inspiration and guidance in giving ideas and assistant in this project.

I would also like to express my thanks to my friends for their suggestions and contribution to this project.

ABSTRACT

This project paper provides an overview of the recent developments in the area of speech processing and in particular in the field of speech recognition.

This project paper will present the results of an ongoing work in using Matlab for speech recognition to identify the words spoken by a user. The data used are words 'SAYA' and 'NAMA SAYA IDA'. These words were recorded using spectra software and export to the Matlab.

Matlab is used to recognize the user by comparing the real user's voice waveform and the waveform that recognized by Matlab.

TABLE OF CONTENTS

CHAPTER

1

INTRODUCTION

| 1.1 | Introd | Introduction | | |
|-----|-------------------------|----------------------------|-----------------|---|
| 1.2 | Scope | Scope of Thesis | | |
| 1.3 | Review | | | 2 |
| | 1.3.1 | Human Speech Communication | | 2 |
| | 1.3.2 | Mechanisms and Models of | | |
| | Human Speech Production | | | 4 |
| | | 1.3.2.1 | Breathing | 6 |
| | | 1.3.2.2 | The Larynx | 6 |
| | | 1.3.2.3 | The Vocal Tract | 8 |
