## ACKNOWLEDGEMENT

Alhamdulillah, praise and thank to Allah because of His Almighty and His utmost blessings, I was able to finish this project within the time duration given.

First and foremost, I am grateful to my supportive and helpful supervisor Dr Hasiah Mohamed @ Omar for assessing and guiding me in the completion of this project. She had always been my source of motivation and guidance. I am truly grateful for her constant support and cooperation in assisting me all the way through these two semesters.

Special appreciation also goes to my beloved parents Zainudin Bin Mohd Mokhtar and Noor Rizan Bt Che Harun for their support and pray even though we are farpart. Not to forget, to all my siblings for their pray and support.

Last but not least, I would like to express my gratitude to my dearest friends and lecturers on their support and help that contributes to my project completion and during my study. I am indeed very grateful to have all of you around me thus given me courage and energy to complete this project. Thank you very much to all of you.

## ABSTRACT

Arabic Language is one of third languages offered to UiTM (Terengganu) students which are also a compulsory subject in their courses. Arabic Educational Courseware (E-ArabiC) has been developed for helping UiTM student in learning Arabic Level II in UiTM (Terengganu). This is because currently Arabic Level II does not provide any application tools for this subject. Besides, the students also are taught using traditional method, complement by Arabic Languages textbook in order to practice properly pronunciation and grammar of this subject. This courseware is design based on ADDIE Model in order to provide a guideline in development of courseware that would fulfill the needs in teaching and learning process. ADDIE Model is one of the instructional system design model (ISD). By using interactive multimedia, this courseware can help in improving students' competence in learning and practicing Arabic Languages. An interview was conducted with the expertise and questionnaires were distributed to the students to get feedback on this project. The results of the evaluation indicated that usability construct shows the highest mean, Mean=4.61 and SD=0.558 between others construct. It shows students are very interested in using courseware as part of their learning process because E-ArabiC is effective and ease to use. The courseware needs further enhancement in terms of contents, examples given and exploitation of multimedia elements to serve as a complete learning and teaching aid in near future.
