ACKNOWLEDGEMENT

In the name of Allah, the Most Merciful and the Most Gracious. Thank to Allah SWT for giving me the strength and opportunity to complete this project paper. Without His Grace and Mercifulness this project paper may not completed on time.

This project paper will not be completed without the help from other people. Therefore I would like to express my heartfelt appreciation to each of them who had directly or indirectly been involved in my preparation of this project paper.

First of all, I would like to acknowledge the encouragement and guidance rendered by my advisor, Puan Hajjah Wan Hasni Binti Wan Hassan. I am indebted to her for her advice, comments, ideas and inspiration throughout the completion this project paper. I also would like to express my thanks to Associate Professor Dr. Nik Muhamad Naziman and Puan Nik Maheran who is also gave big contributions towards the completion of my research project.

My special thanks also go to my family especially my father, Mohd Zaabar Bin Imam Erah and My mothers Saadiah Mohamad and Wan Zainab Wan Adnan. Not forgotten also to my sisters and brothers Zawiyah, Mohd Saufi, Mohd Asrul, Nor Aishah and Nor Fahana Akila for their moral and financial support.

A special thank you to all my friends, for their support and encouragement, especially my housemates Rosyamapati Ahmad, Nor Azlizawaty, Nor Afni, Zakiah and Farah.

Last but not least, my special gratitude to librarians at Universiti Teknologi MARA, Machang and also to Dr Ahmad Razi Head of Analysis and Strategy Monetary Department at Bank Negara Malaysia, Mohd Fauzi Hussain at Corporate Services Department and all the Bank Negara Librarians. Thank you.

ABSTRACT

This study examines the relationship between stock market and major macroeconomic variables in 3 Pacific Rim countries. This study is undertaken because of the controversy opinions about the causal relationship between stock market and macroeconomic aggregates. The variables in this study consist of stock market, money supply, national income, interest rate and rate of inflation and the data are collected on monthly basis from 1995 to 2004. The tools such as Regression Model, Correlation Coefficient, and R Square are used to identify the relationship between dependent and independent variables. The T-Statistic and F-Statistic are used to test the significance between the dependent and independent variables. The findings and results show a positive relationship between stock price and major macroeconomic variables. On the other hand the result also found that there are significant relationships with money supply, national income, interest rate and rate of inflation.
