Introduction

Fundamentals of Islamic Banking is a compulsory course for every Islamic banking student. This is because this course introduces the basics to the Islamic banking system through shariah principles.

The application of products according to the shariah concept used in the Islamic banking system should be understood by every student. However, there are still constraints for students in understanding the Islamic banking system and also the shariah principles used in this course.

Therefore, the development of teaching and learning applications has been developed for the basic course of Islamic banking system to help students and instructors to facilitate understanding in the course.

Let's go Teaching and Learning Digital of Fundamentals of Islamic Banking Application is a platform created for students who enrol in the Fundamental of Islamic Banking course.

Novelty & Uniqueness

- 1) The form of module arrangement, slide notes according to more systematic chapters that make it easier and more informative,
- 2) Test the student's understanding easily through the exercises provided
- 3) Easily identified as a compact and Shariah-compliant teaching and learning tool
- 4) Orientation of formula principles based on current Islamic banking and financial institutions
- 5) The ideal PnP method to apply
- 6) Easy to use and carry (compact) anywhere

Importance to Ummah

This application can use to all education in Islamic Banking and any Islamic financial system.

- 1) Increase students' interest and attention towards Islamic banking learning
- 2) Provide opportunities for m instructors to diversify teaching and learning methods
- 3) Facilitates the process of understanding and remembering calculation formulas

Conclusion

This aid tool has a significant impact on the country's education system and is effective for students and educators as an option for young people to develop new knowledge and develop team spirit. This is in line with the importance of learning the Islamic banking system to meet the needs of Muslims and spread the eminence of Islam.

This application helps students to retrieve materials such as course information, modules, slides, past year questions, calculation exercises, and lecture videos. Digital Teaching and Learning is a dynamic, visible, responsive and effective application representing the one-stop Centre of information in serving students and the community.

Thus, innovative product design educationally represents a digital combination of workable technology and current learning and teaching needs that properly qualify with appropriate items to accurately perceive the fundamentals of Islamic Banking. This application can use to all education in Islamic Banking and any Islamic financial system.

Problem Statement

1) There is no specific teaching aid design for the subject of Islamic banking to help provide easier and faster understanding to students

2) The difficulty of students to understand the real concept in shariah compliance and the constraints of students remembering calculation formulas in Islamic banking financing instruments

Objectives

1) Submit the invention of P&P aids to help students understand the Concepts, operations, applications and calculation methods in financing banking products more efficiently.

2) Facilitate students to create exercises and revisions based on mind maps and computational questions. In addition, this innovation is very helpful for students because it is also the reviews and descriptions from banking experts in the attached video. The student can also easily remember the formulas that are found in the examples of calculations.

3) This application helps students to retrieve materials such as course information, modules, slides, past year questions, calculation exercises, and lecture videos.

4) This application are develop for provide a platform where students can easily access information and materials for CTU351 course.

Commercial Potential:

Expected demand and there is a purchase or desire buy (Intention to purchase):

- 1) Lecturers and diploma students at every UiTM campus
- 2) Lecturers and diploma students at IPTA and IPTS
- 3) High School Students and Public Society
- 4) Islamic Religious Institutions (JAKIM, State Islamic Religious Council)
- 5) Institute of Islamic Banking & Finance
