ACKNOWLEDGEMENT

Grateful to Allah S.W.T and His Messenger Muhammad S.A.W

Alhamdulillah, with the courage and continuous effort, we manage to complete our research. Completing this research was hard and challenging task for us. However, with helping from our friends, family and especially our supervisor Miss Ibianafiorinciliana Nane Anthony Aning to finish out research. She had supervised, monitor and motivates us throughout the process until we end up with this research report. Then, sincerely thanks to her for being there in our moments of need to finish this report.

Special thanks also to The Head of Program of Administrative Science and Policy Studies (FSPPP), Madam Intan Shahriza Binti Azizan, Madam Dg. Siti Noor Saufidah Binti Ag. Saufi whose responsible to teach us in SPSS analysis, all of FSPPP lecturer at Universiti Teknologi Mara (UiTM) Cawangan Sabah and all selected organization from public and private sector whose give opportunities and support us in contributing a piece of work that could develop the education in UiTM.

ABSTRACT

This paper is to study on the level of Job Satisfaction among nurses in KPJ Sabah Specialist Hospital. Job satisfaction is defined as a pleasurable feeling that result from the perception that one's job fulfills or allows the fulfillment of one's own job values in organization as the higher the job satisfaction, then the more likely employees will hold the positive attitude towards their jobs. The objective for this paper is to identify whether the reward system has a relationship with job satisfaction among the nurse in KPJ Sabah Specialist Hospital, to identify whether the working condition has a relationship with job satisfaction among the nurse in KPJ Sabah Specialist Hospital and to identify whether the supervision has a relationship with job satisfaction among the nurse in KPJ Sabah Specialist Hospital. The studies are focusing on 100 of nurse respondent in KPJ Sabah Specialist Hospital.
