ACKNOWLEDGEMENTS

In the name of Allah, the Compassionate, the Merciful, Praise to Allah, Lord of the Universe, Peace and Prayers be upon His Final Prophet and Messenger. We would like to thank God Almighty without His blessings we will not have successfully completed this report.

First of all we would like to express our grateful to Universiti Teknologi Mara (UiTM) for providing an opportunity to the students to apply what has been teaching from the lecturer to us in completing this research paper. After one year, we were finally completed our research project paper. Both of us would like to express our big thanks and appreciation to our academic supervisor, Madam Dg Siti Noor Saufidah Binti Ag Mohd Saufi because of her guidance. Her advice, guidance and comments are very helpful for our future working life and also for completing our final report for this research paper.

Next, to our friends, thanks for keep reminding us the dos and don'ts during the finishing of this research paper. In addition, they were also shared their experiences and information about the related issues that can be us as the extra information for our task. These special thanks also are dedicated to all the staffs at UiTM Kota Kinabalu library that had given their support in finding the suitable materials for us. We were very lucky to have a good cooperation from all the people around us. Because of their kind-heart, we were able to gain new knowledge and valuable experiences during this training. Lastly, we would like to show our appreciation to parents for giving us the moral support to finish up our applied research project without any problems.

ABSTRACT

The purpose of this study is to see the perception of rural people towards Vision 2020 and their awareness about the infrastructure development in their area. The study was done at Kg. Pituru (Darat and Laut), Kota Belud, Sabah. The respondent of this research were the villagers of Kg. Pituru Darat and Kg. Pituru Laut, Kota Belud, Sabah. The result shows that the villagers were very optimist towards Vision 2020. They were optimist in the agenda of government in achieving the Vision 2020 and very optimist towards government intervention in the development of infrastructure in the village as well. There were only the perceptions towards government participation was quiet low because of less intervention from government towards the development of the village regarding to the interviewing session with the respondent which is the villagers itself.
