ACKNOWLEDGEMENT

All Praise to be Almighty Allah, for giving us this opportunity, strength and patience and guidance throughout the process of completing this research. First of all, we would like to express our sincere gratitude to the respective supervisor, Mr Tony Paridi Bagang for his endless advice, guidance and recommendation in every stage of completing this and also spent a lot of time in giving the instruction.

We are grateful to have full support and motivation from many people throughout completing this research and we would like to take this opportunity to thank those who are either directly or indirectly involved in this research stage. This appreciation also delegate to the Inanam Villages for their cooperation in giving their response to be our respondent for this research in obtained the relevant information and materials. Without their help and guidance, this will not be excellently completed.

Our appreciation also goes to our beloved family whom never failed to give their love, support and prayer. Lastly, thanks to all our friends, for their sincere encouragement. We hope that this final product is a worthy reflection of their effort. Thank you.

ABSTRACT

Nowadays, women and politics is not a new issues to be discussed since the women nowadays synonym with the contribution the politic especially in the election process but there also certain countries that still discrimination toward the women right to involve in the political and less of freedom towards the women right such as in India. Besides that, there are growing body of literature that discusses on the women movement in the participation in the election and also discussed the how far the level of women participation in election toward the several past research. This paper provides empirical evidence based on the finding on the positive correlation between the women participation the state election with related to the several factor that influence the level of participation of women. A questionnaire was prepared and 110 respondents and returned on 99 responses from the several villages in the Inanam constituency. The results of the analysis indicate that the women participation in the Inanam constituency was in the moderate level of participation.
