ACKNOWLEDGEMENTS

Foremost, I would like to express my deepest gratitude to God for blessing me with the wisdom to complete this research project. This research is the result of vigorous effort on my part along with the help from many others who may directly or indirectly contribute on the completion of this particular work.

I am heartily thankful to my outstanding advisor, Madam Rosdiana Bt Hj Sukardi, whose encouragement, guidance and support from the initial to the final level enabled me to develop an understanding of the subject. I truly believed this research will not be able to continue or meet the deadlines without the superb supervision and fantastic support from her.

I wish to extend my thanks to Ms. Kashmah Bt A Karim and Mr. Ezramian B. Jamian for giving me the opportunity to do my internship training with PETRONAS Carigali Sdn Bhd, Sabah Operations. Furthermore, I would also like to say thank you to Puan Suzy Bt Bongsu, Mr. Hanif B A Salim, Mr. Jainuddin B Malik, Puan W Shafaf Bt W Ilias, Puan Hawwa Athiyah Bt Abd Aziz, Puan Rohaizah Bt Akramhan, and Ms. Zaitun Saifuddin for their advice and assistance in helping me to finish this research project especially with their ideas, opinions, comments and constructive criticism which I fully appreciate.

Finally to the people who were involved in this project especially to those who took the time to complete the survey questionnaire as well as giving appropriate recommendations, a special thanks to each and every one of you. Because without your cooperation, this research project will not be effective as it would be now.

Thank you so much!

ABSTRACT

This report investigates the implementation of Health, Safety and Environment (HSE) practices among the staff in PETRONAS Carigali Sdn Bhd, Sabah Operations (PCSB SBO) and how they embrace it in their daily activities at the office which then relates towards achieving excellent HSE performance. Preventing accidents and ill health caused by work is a key priority for everyone at work. As competent employees are valuable, providing HSE training to the staff helps them to ensure employees are not injured, contribute in the development of positive health and safety culture, and also to protect the health and safety of their employees as required by the law.

A total of 30 respondents from three different departments were randomly selected. The researcher distributed survey questionnaire to the staff in which they filled out and also gave their views, opinions and recommendations on how to improve the on-going practices within the organization. Using qualitative analysis, the data obtained were analyzed using Microsoft Excel and converted into pie charts and percentage. From the information obtained, the main finding is that the staff is practicing good HSE practices and they do understand what are required from them in terms of embracing and the implementation of HSE culture. However, there is still room for improvement. The researcher hopes this study can give PCSB SBO some insight regarding the HSE programs they have implemented all these while and how it was received by the staff thus opening some new opportunity that they might explore.
