ACKNOWLEDGEMENT

First and foremost, I want to express my gratitude to Allah for providing me with the chance to pursue my diploma and for successfully finishing this long and difficult road. Dr. Shukriah Binti Abdullah, my supervisor, deserves my appreciation and thanks.

Furthermore, I dedicate this dissertation to my father and mother, who had the foresight and desire to educate me. This triumph is dedicated to you, Mohd Burhan Bin Ramli (father) and Rahayu Binti Abu Bakari (mother).

ABSTRACT

UiTM Campus Bukit Besi is well-known for its engineering campus, with engineering majors accounting for the vast majority of its students. Musculoskeletal problems are typical in any workshop activity where students labor in inappropriate postures, such as welding. The study's aims are to identify musculoskeletal discomfort among Mechanical Engineering students at UiTM Bukit Besi. RULA is an ergonomic method for looking at posture, forces, and muscular activity that have been linked to repetitive strain injuries. It is called the Rapid Upper Limb Assessment (RULA). The RULA approach can detect the severity of pain or musculoskeletal diseases suffered by UiTM Bukit Besi engineering students. The ergonomic assessment gives a risk score that ranges from one to seven, with higher values indicating more risk. This means that it is important and necessary to change work postures as soon as possible.

TABLE OF CONTENTS

	Page
CONFIRMATION BY SUPERVISOR	ii
AUTHOR'S DECLARATION	iii
ABSTRACT	iv
ACKNOWLEDGEMENT	v
TABLE OF CONTENTS	vi
LIST OF TABLES	viii
LIST OF FIGURES	ix
LIST OF ABBREVIATIONS	xi
CHAPTER ONE : INTRODUCTION	1
1.1 Background of Study	1
1.2 Problem Statement	2
1.3 Objectives	2
1.4 Scope of Work	3
1.5 Significance of The Study.	3
CHAPTER TWO 3: LITERATURE REVIEW	4
CHAPTER THREE : METHODOLOGY	13
3.1 Introduction	13
3.2 Flowchart	14
3.2.1 Interviewing and observing	15
3.2.2 Determine Body Position Selections	15
3.2.3 Determine postural angles of body positions	15
3.2.4 Do Muscle Use & Force/Load Analysis	15
3.2.5 Calculate Results	15
3.2.6 Implemented Ergonomic Improvements and do prevention exercise	16

CHAPTER FOUR : RESULTS AND DISCUSSION	17
4.1 Introduction	17
4.2 Musculoskeletal pain on welding activity	17
4.3 RULA analysis	17
18	
4.3.1 Arm and Wrist Analysis	19
4.3.2 Neck, Trunk and Leg Analysis	23
4.4 Identify Musculoskeletal Pain	26
4.5 Discussion	27
CHAPTER FIVE : CONCLUSION AND RECOMMENDATIONS	28
5.1 Conclusions	28
5.2 Recommendations	28
5.2.1 Prevention Activities	28
CHAPTER SIX REFERENCES	34
APPENDICES	40
