ABSTRACT

This research is conducted at Rumah Pangsa Limauan Jalan Safoda Kinarut, 89600 Papar Sabah where 150 respondents have involved. Rumah Pangsa Limauan Kinarut, Papar is a Squatter Resettlement for squatters in Sri Tanjung, Putatan. We will conduct research on resident's perception towards the effectiveness of squatter resettlements. Residents in the Rumah Pangsa Limauan Kinarut will be our respondent in order to get the information that can be used in our research. This section will discuss on differences among the socio-demographic factor (gender, age, marital status and races) of respondents on the perception towards squatter resettlements in Rumah Pangsa Limauan Kinarut. Our objectives are to determine resident's perception on squatter resettlements and to determine resident's perception on the effectiveness of squatter resettlement.

ACKNOWLEDGEMENT

First of all we would like to thanks to Allah S.W.T for granting us the opportunity and strength to complete this research. What's more, we would like to express our grateful to Universiti Teknologi Mara (UiTM) for providing an opportunity to the students to apply what has been teaching by the lecture to us in completing this research paper. Both of us would like to express our thankful and appreciation to our academic supervisor, Madam Siti Yasmin Bte Badrum for her valuable guidance. Her advice, guidance and comments are very helpful for our future working life and also for completing our final report for this research paper.

Next, an honourable mention goes to our families and friends for their understanding and supports on us in completing this research. These special thanks also are dedicated to all staff at UiTM Kota Kinabalu library that had given their support in finding the suitable material for us. We were very lucky to have a good cooperation from all the people around us. Because of their kind-heart, we were able to gain new knowledge and valuable experiences in completing this research.
