About The Book

This book is a compilation of summaries that describe the programmes that have been run by the academics and students at the Faculty of Education, Universiti Teknologi MARA. The main objective of the programmes is to create a platform for the faculty members to take part in social innovation projects in the local community. More importantly, the programmes also complement the students' regular class experience as they also can learn a range of skills that can make them more active socially and entrepreneurially.

Definition of social innovation:

Social innovations are new ideas that meet social needs, create social relationships and form new collaborations. These innovations can be products, services or models addressing unmet needs more effectively.

Educational Mural for Pre-School at Sekolah Kebangsaan Raja Muda (SBT) (SKRM)

Contributor

Roslaili Anuar

What

In collaboration with Sekolah Kebangsaan Raja Muda (SBT), the Educational Mural project for Pre-School, themed the Jungle, was conducted.

Who

This is one of the community projects that the semester six students majoring in Art and Design Education did to complete their Micro Teaching journey. This project aims to provide the students with the experience engaging in a community service and, at the same time, to provide them with the experience to be in the school environment before they undergo their practicums. The knowledge gained is valuable in developing a lifelong learning lesson and, thus, leads to a meaningful learning experience. Active learning is important to reinforce not only the knowledge but also the students' skills through the mural-making process.

When

This programme was conducted on 30th of March and completed on the 31st of March 2019.

Where

The mural is located at the walkway of the pre-school, located at Sekolah Kebangsaan Raja Muda (SBT). It was created to make the pre-schoolers feel happy being at school. The mural was also created as one of the ways the learners could learn the alphabet and numbers in a fun way.

Story

The activity was designed to enable the semester six students to practise what they learned during the past semesters. It was meant to give them the exposure to the real school surroundings and make them learn to manage their activities properly. The activity also aimed to train the students to communicate professionally with the school teachers and administrators. The students were involved from the beginning as they actively generated initial ideas until the end when the mural was successfully completed under the watchful eyes of their lecturers.

Beneficiaries/ Stakeholders

The Educational Mural project was co-organized by Sekolah Kebangsaan Raja Muda (SBT) and the Art and Design Education Department, Faculty of Education, Universiti Teknologi MARA.

Key lessons

The activity provides the students the training to involve themselves in a community service and, at the same time, to experience working in a team. The activity also is a proper platform for the students to share their knowledge and express themselves through the school murals.
