## ACKNOWLEDGEMENT

I am thankful to God that I managed to finish the survey without any misshape and it is done in accordance with the timeline that I have prepared. Although it is difficult to acquire all the data for the survey in a short amount of time but I still manage to accomplish the task with success. I would also like to give a warm appreciation to both my parents and siblings for giving the support that I need to accomplish the task. Also not forgetting my advisor who relentlessly support and correcting the mistakes that I made along the way so that I can achieve better result in my survey. Also a warm appreciation to my supervisor and all the staff of Kota Kinabalu Wetlands who have given me a comfortable workplace and enjoyable journey in becoming a working adult.

## ABSTRACT

This study is done to ascertain the level of awareness of the community near Kota Kinabalu Wetlands. This study is important in understanding the community of Kota Kinabalu Wetlands so that it can benefit the centre in the future. This will also deepen the relationship of the community and the society in term of working together to create a better environment that can benefit both us and the future generations. The aim of this study is to (1) identify the demographic of the community near Kota Kinabalu wetlands, (2) to determine the level of awareness of the community towards the centre, and (3) to understand the perceptions of the community towards Kota Kinabalu Wetlands. The method use to gather the information needed for the survey will be via questionnaires and interviews with the community.
