## ACKNOWLEDGEMENTS

I wish to thank the many individuals who contributed so graciously towards the realization of this thesis. First I'd like to thank my family for their love, sacrifice, moral support, patience and forgiveness. I would like to give my zillions of thanks and appreciation to my father, En Ramlan Bin Hassan for his kindness and cares to me, and willingly supporting my financial needs as long as I'm studying in UiTM and along these eight semesters. Many friends and colleagues have been more than generous in providing me with illustrations included in this thesis. Here I need to mention Syawani Binti Abdul Hamid, my friends and classmate who always gave me those moral supports and advices. A very special mention of gratitude goes to my supervisor for this thesis, En. Suffian who has provided me with ideas and teach all of us on how to produce this research, correcting the mistakes we made in this thesis and gave us spectacular advices as long as the production of the thesis. I need to mention the extraordinary helps from few of my friends, Nur Azra Binti Abd Rahman, and Nurul Hanis Binti Abu Khari for always supporting me, providing me photographs and gave so much helps of doing the research in UiTM Sri Iskandar Library and I am very grateful for their help. Finally, this research would not have been possible finished without the permission of Librarian and UiTM Seri Iskandar Library Management to do the research of my thesis in the library.

# **INFLUENCES OF DAYLIGHTING T SATISFACTION AT UITM SERI ISKANDAR LIBRARY, PERAK**

## **ABSTRACT**

Designing library study environment is important to the mood, motivation and performance of individual because interior design plays an important role on human mood and social behaviours. The results of a good and satisfying environment of a certain space will lead to the maximum human comfort and satisfaction. It including the primary factors like the vantilation, lighting, acoustic value, thermal comforts, and others. Lighting, as a control architectural tool, gives important influences on users' perception behaviour and visual comfort in libraries. A library in UiTM Seri Iskandar was chosen as the main subject to continue this study. The library is located at the centre of the UiTM campus and it is a two storey building which is have three level of the reading space. The study was conducted at the ground and the first floor of the library.the second floor of library was closed due to the renovation. It showed, there is a different environment between those two levels due to the different arrangement of bookshelves, furnitures, and the amount of the daylight that could enter in a library. The observation shows there is a different pattern of user's seating preferences and the result also found that the library users prefer the seat near daylighted area, but the time spend in the library is not really affected by daylighting. Besides for visual comfort, daylighting is not the only contributor to overall comfort and user's satisfaction. The presence of air conditioning, and comfortable couch also might be a variables to the time spend and user's satisfaction in a library.
