## **ABSTRACT**

For this study, the purpose of this research is to examine the effect of remittances, foreign direct investment, export and exchange rate towards economic growth. The data of this research are obtained from World Data Bank and it based on the country which is Malaysia. This research consists of data from the year 1987 until 2017 and using of secondary data method. The variable for dependent variable is growth domestic product (GDP) and for independent variable are remittances, foreign direct investment, export and exchange rate. The data ran by using Eview and being analyzed by ordinary least square method. The result from previous studies shows that there will be significant and insignificant result from each variable.

## **ACKNOWLEDGEMENT**

Firstly, I wish to thank Allah for giving me the opportunity to embark on my final year project and for completing challenging journey successfully despite of all difficulties that have be through.

Secondly, my appreciation and thanks go to my advisor, Mr. Khairul Ariff bin Noh and also my final year project coordinator, Madam Nur Liyana binti Mohamed yousop for giving me advices, support, motivation and guidance along this journey in completing my final year project.

I also would like to dedicate my appreciation to my friend who helped me directly or indirectly. Without them, the final year project would become more difficult to complete. Thanks to them, I manage to complete this final year project.

Finally, this thesis is dedicated to my beloved family especially to my mother, Azalia Binti Taharim and my father, Jamil Bin Marsidi for always giving me support, motivations and sincere blessing. Thank you so much for the people who involved in this project directly and indirectly. May Allah repay your kindness with blessing in this world and hereafter.
