ACKNOWLEDGEMENT

Bismillah, in the name of Allah. I would like to express the deepest appreciation to all those people who help me to possibility complete this report. A very special gratitude would belong to my lecturer supervisor TS SR DR Ida Nianti Binti Mohd Zin whose contribute to manage me as her student.

Futhermore, I would like to acknowledge my report with a very appreciation to the staff En. Ibrahim bin Abu Bakar as my supervisor who conduct and always observe my training at HBA CONSTRUCTION AND ENTERPRISE. Other than that, he also help me a lots to giving me tips and surely help me to give an idea to complete my report. Also , I would like to thanked to my employer Encik Zaidi Bin Tumpang as a company's owner and manager for giving me a trust to join HBA CONSTRUCTION's team. He also guide me lots and always giving me an advices. He also invested his full effort in guiding the team in achieving the goal. I have to appreciate the guidance given by other supervisor as well as the panels especially in our project admin that has improved my presentation skills and guide me how to manage and arrange the documents given by the managers and client.

ABSTRACT

Floor Finishes means in relation to replacement of floor finishes, carpets, vinyl coverings, vinyl tiles and in relation to repair of floor finishes, replacement of small areas of tiling. In other words, floor finishing is also provides the support for the flooring. Special purpose subfloors like floating floors, raised floors or sprung floors may be laid upon another underlying subfloor which provides the structural strength. The type of flooring finishing types aimed in this report is interlocking. Interlocking floor tiles are tiles that interlock together to form a floating floor. Most types of interlocking floor tiles. Some types of interlocking rubber tiles are made for use in public road finishing such a bus station. The report conducted for the renovation project located at ONE SEGAMAT'S BUS STATION, SEGAMAT JOHOR under by MAJLIS PERBANDARAN SEGAMAT (MPS) . The objectives of the report is to describe the types of floor finishing such as interlocking, the advantages and to look the problems according the interlocking and the solution of it.

1.0 INTRODUCTION

1.1 Background of Study

1.1 BACKGROUND OF STUDY

In building construction study scope, floor finishes is the finale part of construction whether renovation. Types of floor finishes is polish concrete, hardwood, laminate, ceramic, carpet, stone, vinyl, cork and many more. Each types of finishing are various in property and used in different place.

TYPES	PURPOSES	PLACE	FIGURES
Polish concrete	Long-lasting and more durable under heavy foot traffic	usually used in commercial projects	
Hardwood	Wood floors are easier to clean and less likely to be damaged. floors are typically sealed surfaces with a protective layer of finish, wood floors	Usually used in interior floor furnitures for home
