## **ACKNOWLEDGEMENT**

We would like to express our sincere gratitude and appreciation to these following people for there involves in our final project report. Firstly to our project advisor, Mr. Suhaime Suparman for his continue support, generous guidance, help, patience and encouragement in the duration of the final project report preparation until its completion, second to Mr. Ng Wai Leong, General manager of City Karting Enterprise and all of his workers for their co-operation, opinion and concern to us, and then for Faculty of Mechanical Engineering UiTM Shah Alam for all of the information and guidelines about the final project and lastly to all our fellowships, group 6D (Nov 2001-Mar 2002) for their support and encourages. Thank you very much.

## **ABSTRACT**

The study of the go-kart assembly is not only focus on the assemble only, its also cludes many aspect on the go-kart like economic, factor, advantages and problem that volve in go-kart manufacturing field nowadays. This is a kind of very limited source of vision of study is important for the study of the go-kart itself.
