ACKNOWLEDGEMENT

The authors would like to acknowledge the Malaysian Government, through The Institute of Research Development and Commercialization (IRDC) UiTM for the financial support of this project. We would like to express our gratitude to IRDC for their support and encouragement throughout this project.

Our greatest appreciation and thanks go to Profesor Dr. Mohd Nasir Taib, Miss Nalia binti Tajri and Miss Siti Fairuz binti Tajuddin for assisting in completing this project.

CONTENTS

1. Introduction	1
1.0 Foreword	1
1.1 CO ₂ sensing theory	1
1.2 Sensing of CO ₂ by using optical fibre sensor	2
1.3 Optical fibre chemical sensor	6
1.4 Principle of sensing	6
1.5 Instrumentation	7
1.6 Sensor configuration	9
1.7 Advantages and disadvantages	11
1.8 Artificial neural network, ANN	13
1.9 Objectives	15
2. Optical fibre CO₂ sensor	16
2.1 Experimental	16
2.1.1 List of chemicals	16
2.1.2 Methods	16
2.2 Results and discussion	18

2.2.1	Sensor's response	18
2.2.2	Sensitivity	21
2.2.3	Cross-sensitivity	22
2.2.4	Effect of the dye concentration	23
2.2.5	Effect of relative humidity	24
2.2.6	Effect of the different film composition	25
2.2.7	Effect of the different dyes used	26
3.	An intelligent optical fibre pH sensor	28
3.1	Foreword	28
3.2	Brief review of optical fibre pH sensor	28
3.3	Experimental	30
3.3.1	Chemicals and solutions	30
3.3.2	Procedure	30
3.3.3	Instrumentation and measurement	31
3.3.4	Data treatment and analysis	31
3.4	Results and discussion	32
3.4.1	Spectral properties	32
3.4.2	Multivariate calibration	33

3.4.3	Prediction of unknown pH solution	38
3.4.4	Ionic strength effect	38
3.4.5	Repeatability and reproducibility	39
3.4.6	Hysteresis study	40
3.4.7	Response time	41
3.4.8	Photostability	42
4.	Conclusion	43
4.1	Optical fibre CO ₂ sensor	43
4.2	Optical fibre pH sensor	43
5.	Bibliography	45
6.	Appendix I	
7.	Appendix II
