ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and the Most Merciful, Alhamdulillah, all praises to Allah for the strengths and His blessing in completing this research proposal. For us, completing this research project was a difficult task. Fortunately, we had a lot of help from a lot of people, which made our research a lot easier. During the times when things did not go as planned, all parties involved in this study project kept us motivated and on track.

We owe a special thanks to our supervisor, Dr. Mohamed Fajil bin Abdul Batau, for his stimulating recommendations and support, which greatly aided us in coordinating our proposal, particularly in writing this research. Thank you for his constant guidance and support. His great assistance with constructive comments and ideas throughout the experimental and project work has contributed to the success of this research named The Factor of Increasing Cybercrime in Johor Bahru and Batu Pahat, the capital cities of Johor. We want to show our gratitude to our parents for their inspiration and motivation, financial support, and encouragement.

Last but not least, we appreciate and thank our friends for their assistance in terms of time and information that they have provided with us as we progressed through this research proposal. We feel honoured to remember all of the participants and respondents. Thank you to everyone who helped with our initiative, both directly and indirectly, your generosity means a lot to us.

ABSTRACT

To the completion of this study, a quantitative survey is conducted in two metropolitan cities in the states of Johor which are Johor Bahru and Batu Pahat encompassing 200 respondents to investigate the relationship between education, enforcement of law, cyber control in Malaysia and number of Internet users towards the number of cybercrime cases. The study then is useful especially as a wake-up call to ensure and guarantee appropriate record of the personal data of the Internet users.
