## ABSTARCT

The community may be a group or community group living in one space. The community is additionally a group of individuals who are united within the same close area. Communities living during a rural area used the outdoor area as a recreational space for social activities and leisure with their families, friends and other. There are difficulties find sites for recreational space that are simply accessible to the communities in the rural area. Hence, the purpose of the recreational area at Krubong Housing Program, Melaka along Melaka river. Krubong district lack of recreational space for communities nearby. It based on observation and collection data in site study, Krubong Housing Program is potential and opportunities to purpose the recreational space additional can be brought back the communities lifestyle. This topical study is to reminiscing the community lifestyle at Krubong Housing Program, Melaka through river community sustainable approach. The opportunities to purpose recreational trail along Melaka river also linkage with Stadium Hang Jebat at Melaka. The methodology of this study is site observation based on site inventory and analysis also secondary data from the government department and existing data published especially Melaka River timeline. The finding of this study at Krubong Housing Program, Melaka will produce a master landscape planning which is can achieve the aim and objectives of the study and apply the solution and design treatment on issues and problem of site study. Krubong Housing Program will be promoting the recreational trail along Melaka River and attract local people especially to enhance the quality of space and community lifestyle.

## CHAPTER 01: INTRODUCTION OF TOPIC

### 1.0 INTRODUCTION

In this topical study, it explores the issues of community landscape and public open space and by integrating the river of community approach; it will produce a solution for the development of a community landscape and public open space sustainable.

The community is a group or community group living in one area. The concept community is also a group of people who are united in the same surrounding area. Communities living in a rural area used outdoor space as a recreational space for social activities and leisure with their families, friends and other. According to by Team Danketsu (2014), sustainability or to sustain suggests that 'to maintain; detain existence, keep going. A responsibility application of property to human society interprets into process goals of each community. Communities with their human systems area unit difficult which they area unit a variety of things that get play as a community pursues its process goals. Therefore, should be an inspiration translated to a community's development. of the present generation whereas not compromising the flexibility of future generations to satisfy their own desires.

According to Hari Srinivas (2016) in general, river embody all completely different many alternative values to different people. as an example, rivers symbolize connections, since they bit everyone, and everybody, in essence, lives downstream. In addition, river is symbolizing human health, since water from rivers is very important to our communities and ourselves, However, some perception thinks communities living on rivers are most plagued by these negative trends. Between the consequences of the community on the river cause pollution of drink, and diversity loss are the highest two environmental issues. Communities understand that protective and preserving rivers - the main supply of drink - is vital for their future survival.
