## **ACKNOWLEDGEMENTS**

Alhamdulillah to Allah S.W.T the Most Gracious, the Most Merciful and blessing of Allah be upon His beloved Muhammad, for giving me strength and energy to complete this research study, as to fill the requirement as needed by the Faculty of Business Management, Universti Teknologi Mara.

This assignment is made possible through the help and support from everyone, including: lectures, family, friends, and in essence, all sentient being. Especially, please allow me to dedicate our acknowledgement of gratitude toward the following significant advisors and contributors:

First and foremost, i would like to thank Madam Suraya Hamimi Bte Mastor for her most support and encouragement. She kindly read my paper and offered invaluable detailed advices on grammar, organization, and the theme of the paper. She has provided me with her constructive views and full professionalism in guiding me with her knowledge and vast experience.

Next, i would like to thank to my parents and family members for their morale supports. Last but not least, to all fellow friends, I would like to express my deepest appreciation and thank you for all the help, support and time they have sacrificed to me throughout the entire research study.

## ABSTRACT

The purpose of this study is to determine the factors that influencing safety performance. A sample of 73 respondents was selected through convenience sampling. Questionnaire was used as the instrument to collect response. Data has been collected at Hengyuan Refinery Co at Port Dickson, Negeri Sembilan. SPSS was used to analyse the data in order to get the final result of this research study. From the analysis conducted, result has proven that the dependent variable which is safety performance had a positive correlation with independent variable which are management commitment, workers involvement in safety and safety training. Safety training was identified as the most influencing variable that effect safety performance through the multiple regression analysis conducted.
