ABSTRACT

The purpose of this study is to discover the effect of factors such as financial constraints, feeling lonely and low social support and social media addiction towards mental distress among young people due to COVID-19. This research used sampling technique involving 205 respondents from area Seremban 3, Negeri Sembilan. This research aimed to establish the vital relationship between the variables. This research indicates that all the three factors have a significant relationship with mental distress among young people due to COVID-19. In this study, the researchers approach the respondents with the questionnaire through the social media postings. As results, the findings of this study shows that social media addiction as the most significant factor that contributes to the mental distress among young people during the pandemic.

Keywords: financial constraints, feeling lonely and low social support, social media addiction, mental distress, young people, COVID-19

ACKNOWLEDGEMENT

Alhamdulillah, all praises to Allah S.W.T, we are so blessed that we have managed to put an end to this research report successfully with Allah's blessing. We would like to thank Him for giving us good health and ability to go through the period well and peacefully.

First of all, we would like to thank our Faculty of Administrative Science and Policies Study (FSPPP) at UiTM Seremban, Negeri Sembilan for giving us this opportunity to actively involved in this research proposal. Throughout the journey of preparing this research proposal, we surely get a lot of exposure, knowledge and experiences which will be helpful in the future.

Also, we would like to express our deepest gratitude to our best supervisor, Madam Nur Ain binti Yaacob, for her commitment, sincerity and encouragement, which we will never forget. Madam Ain has been an inspiration to us as we struggled to finish this research. This research proposal would not have been possible without Madam Ain's assistance, which allowed us to build an understanding of the topic from the very beginning. We are grateful for the tremendous opportunity she provided for us to progress professionally and for the extraordinary experiences she made for us. It is a delight to learn with Madam Ain.

Next, we owe a sincere gratitude to our lecturers, Dr Mohd Ramlan bin Mohd Arshad, Dr Azma Asnawi Shah Abd Hakim and Dr Nurul Hidayana Mohd Noor for their splendid guidance, full support, excitement, helpful recommendations, and ever encouraging and inspiring guidance in giving a lecture on a research project.

Last but not least, we want to take this opportunity to thank our family and friends for all the emotional strength and moral support. All in all, we wish to express our sincere appreciation to every respected party for their contributions and efforts all along the way.
