ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious, the Most Merciful. Praise to Allah SWT the Sustainer of the world, and peace and blessing be unto Prophet Muhammad pbuh.

First and foremost, I would like to express my gratitude to Puan Suzana binti Hasan for her guidance and his valuable time in supervising me. Her support, constructive comments and suggestions has enabled me to complete this thesis.

I would also like to dedicate special thanks to my parents and family for their prayers and supports, and also their understanding throughout the accomplishment of this thesis.

Finally, I would like to extend my gratitude to all who have been involved directly or indirectly, especially my fellow friends in helping me finish this thesis.

Thank you for all of your support and May Allah SWT bless you.

ABSTRACT

Wasiyyah (will) is one of the issues examined by Shariah scholars. Previous studies on these issues have been carried out amongst public in Malaysia as general. Thus, the aim of this study are to determine what is the factor that influence most of Muslim or non-Muslim in Johor Bahru to make a wasiyyah (will) and the perceptions among them towards wasiyyah. Generally the level of Malaysians awareness with respects to the importance of wasiyyah is relatively very low. There is unclaimed cash and assets left by the dead due to the absence of estate planning of the deceased. This study will be conducted amongst private and public employee working in various sectors located in Johor Bahru through questionnaire and it will be regress by SPSS using multiple regressions. Based on the research done by previous researchers, knowledge will be the most influence factors that have effect the perception among employees but then it is still low.
