A DISHWASHER FOR QUARANTINE

AMKUS (PRODUCT DESIGN)

Design Advisor : MR MUHAMAD AIMAN AFIQ MOHD NOOR

The post-COVID-19 condition, also known as "COVID-19," collectively refers to a group of long-term symptoms that some people experience after they develop COVID-19. People with conditions after COVID-19 sometimes refer to themselves as "long-distance carriers."

AMKUS is a dishwasher for quarantine .Problems during home quarantine such as sharing items that can lead to transmission of covid 19 to family members such as dishes. I, as a designer, need to create a product that can solve this problem. This quarantined portable dishwasher will be able to solve this problem this product also has safety features and additional features that can help anyone who is being quarantined.

After making a study on COVID-19, there are several cases involving the spread of COVID-19 in the house. This attracted my attention to make a product that can reduce the quarantine kiss, especially home quarantine. After the online interview was conducted, I got relevant information from the respondents concerning their feelings and the design and usability of the product. AMKUS benefits that can be given while using this product is to make it easier for users to better maintain hygiene during quarantine it is also designed to look attractive and stylish with simple shape applied in product this.
