CLINARE DOORKNOB STORAGE

(PRODUCT DESIGN)

Design Advisor : MRS IZZA SYAHIDA ABDUL KARIM

Malaysia reported its first three cases on January 25, 2020, all of which were Chinese nationals who had visited the country. By 30th January, the number of cases had increased to eight. In response, the Ministry of Health published guidelines on the virus and established SOP for Malaysia citizen. For our safety in this covid era, we must wear a mask, gloves when we want to buy stuff and use sanitizer wherever we go, but we are ordinary human beings, so we always forgot to wear and use it. Clinare is a storage product that has sanitizer container, gloves and mask storage. This product also has such an ideal size for our home doorknobs. It'll be hanging on to the doorknob so that it can elevate us before we leave the house and the room.

The objectives of Clinare (1) to remind us wear mask gloves and use sanitizer before and after leaving our house, (2) to simplify our affairs, (3) can train people to be more disciplined and organized, (4) it will give many benefits in our life. As my survey there have many various age groups and occupations. So various ideas and opinions that I can consider. But most of them want this product is easy to use because we always hurry and rushing when we want to leave our house. So I try to make this product easy and not complicated. For material, they want safe material so that it can be used for children. Then, they also prefer this product be more modern and not look outdated.

Based on the reported result, research shows that many people forget to wear mask, gloves and sanitizer before and after leaving our house because we are ordinary human beings, we have many things to remember when we want to leave our house. Therefore, the purpose of this survey is to find out ways to remind us to wear mask, gloves and use sanitizer. From the findings it shows that with an innovative product to remind us and to affair our life, it could enhance us never forget to wear mask and use sanitizer again, it will give many benefits in our life after this. It is hoped that, with this invention, it can help people to be more disciplined and alert before leave the house. Hope that we are spared from being compounded or sued after this.
