## OMOCHA : SANITIZER WITH FUN SENSORY TOY (PRODUCT DESIGN)

Design Advisor : MRS IZZA SYAHIDA ABDUL KARIM

Covid 19 is a current disease phenomenon. it started from China and spread to the whole world including Malaysia. Everyone is very vigilant nowadays so as not to be infected with covid19. The government attaches great importance to the health of the people. Everyone needs to keep the SOP set. children are vulnerable individuals. So for that I created a product that is sanitizer with fun sensory toy. This product is to encourage children to use it.

**Omocha** is a sanitizer with fun sensory toy. Not only have sanitizer also it come out with xylophone. It is suitable to use for kids before they go out or play playground. The form of the product is like dinosaur to attract kids. The novelty of this product can be viewed from the function of this product, which the main focus is to encourage kids to use sanitizer.

The reason I design this product is make a different from the existing sanitizer. The omocha is more focusing on kids . This product can be use indoor and outdoor. This product come out with variant colour.

From my survey ,I focusing on public that have kids .Most of the kid of age is around 2 - 5 . The purpose of the survey is to find out what sensory product that suitable for kids during pandemic. Most of them agree that kids more susceptible to Covid. And then the majority is agree that it should integrated sensory product like toy. They also prefer the partial style is memphis. They also suggest the product is user friendly , can use many people and the design is not to big.

Based on the reported result, it is shown that, most of the parent prefer that kids should go out for get a fresh air especially playing playground and dont get bored sitting at home. This product also can reduce the rate of infection.

It is hoped that, with this invention, the kids will be able to spend a lot of time outdoors in order to fill their free time healthily and reduce the rate of infection. Parent no longer have to worry about their child health. And i hope this product can help more people.
