## TRICA

### LOUNGE CHAIR (FURNITURE DESIGN)

Design Advisor : MR ABU HANIFA AB HAMID

**Trica** is a lounge chair inspired by the many shapes of the bird-of-paradise plant. **Trica's** primary form reflects the triangular shape of the plant, focusing on comfort while taking a contemporary approach. The upholstered seat has been redesigned to fit the ergonomics of the user. **Trica** also features an extendable footrest as an additional function. The chair sits low and broad, hovering just over the ground and ideal for relaxing.

**Trica** has an urban feel thanks to its geometrical overlapping back structure and solid bent legs. The curves on the seat's structure are ergonomically developed to provide a comfortable visual balance. The user's posture is supported by the backrest, while the seat provides optimal comfort for lounging. The cushion may be customized with a variety of colours and materials to fit into a range of interiors and reflect personal style. As a result, it can be used in common interior areas.

**Trica** can be used in both living spaces and offices thanks to its reinterpretation of the traditional lounge chair structure. **Trica** is proportioned to provide a comfortable lounge whether working with a laptop or just taking a break to rest, with a residential sensibility. Curves and geometrical structures are combined in this chair. The goal is not only to construct a one-of-a-kind design, but also to create a style that is more fitting for modern living spaces.
