KIDS SOAP DISPENSER

MICKY (PRODUCT DESIGN)

Design Advisor : MRS IZZA SYAHIDA ABDUL KARIM

MyMicky soap dispenser is a concept of a smart soap dispenser with the purpose of teaching kids all about hygiene by making hand-washing a fun experience. It can visualize germs in a playful way, and a countdown timer makes the user experience very intuitive. An interactive projection is cast directly from the dispenser around the rinsing area to entertain and instruct kids on how to make hand-washing more effective.

MyMicky's design goal is to create a hygiene awareness soap dispenser that will entice children to use it on a regular basis while also being durable. MyMicky concept is to solve that problem. The soap dispenser is designed to make hand-washing fun and a 20 second countdown timer gives you proper time to wash hands clearly. Hand-washing is only effective if it's done properly.

The objectives of myMicky soap dispenser are to create a soap dispenser that is unique but also fun to interact with, and to create a soap dispenser that is made of high quality and environmentally friendly materials. Obviously, one of the benefits of using this product is that it is user friendly and enjoyable. Based on the reported result, it is shown that mostly kids are rarely using the soap dispenser at school because the design and the functionality of the soap dispenser do not interact with their taste. It is hoped that, with this invention, preschools and kindergartens always wash their hands using the soap dispenser to prevent them from getting the virus during this pandemic season at school.
