ABSTRACT

Examining the difficulties and their effects on students' satisfaction with their practical training during the pandemic was the study's goal. The trial ran from March to July 2022. Additionally, convenience sampling was used in this study's data collection survey. The findings of the study involve two key components. First, the respondents are FSPPP students in semesters 6 of AM228 at UiTM Seremban 3 with regards to the difficulties and their effects on the students' satisfaction with their pandemic-related practical training. The results show that there is not much difference between frequency levels. Furthermore, the results show that the work style has little bearing on student satisfaction. Therefore, this work is in a unique position to contribute to the multidomain both theoretically and empirically.

ACKNOWLEDGEMENT

Praise be to Allah, the Almighty, for providing us with the chance to fully implement the suggestion. This study proposal was successfully completed with the help and cooperation of numerous authorities. Therefore, we would like to convey our sincere gratitude to everyone who advised, assisted, and supported us as we carried out this research.

Prior to anything else, we want to thank our Faculty of Administrative Science and Policies. Thank you, Study (FSPPP) at UiTM Seremban, Negeri Sembilan, for providing us with this chance to participate in conducting this study proposal. While creating this research proposal, we receive extensive information, expertise, and exposure to a variety of scenarios and challenges that we never experienced before, it cannot be learned from a textbook, and it is certain that these experiences will be helpful going forward.

Second, we want to express our sincere gratitude to Madam Zurina Md Nen, our supervisor, who helped us with the content of the research proposal. Her persistence and guidance ensured that this research proposal would move forward successfully. We genuinely appreciated everything she did to help us.

Last but not least, we would like to express our gratitude to the other lecturers, students, friends, and of course our parents who have assisted us both directly and indirectly with the concept and organisation of the research proposal. They have also provided us with advice and moral support as we worked to complete this research proposal
