ACKNOWLEDGEMENT

We would like to extend our deepest gratitude to all those who have directly and indirectly guided us in this research. Firstly, we would like to thank Dr. Haijon Gunggut, Madam Dg. Siti Noor Saufidah Hj. Ag. Mohd Saufi and Madam Ani Juaini Binti Bahrin, our Fundamental of Research and Methodology (ADS511 and ADS555) lecturers and supervisor for their passion and encouragement, and for doing an excellent job and give advices to us to ensure our research is successful. Without the helps from them, we surely came into deep problems in completing this research within the time duration. Many people, especially our friends and team partners itself, have made valuable comments and suggestions on this research, which gave us the inspirations to improve our research. Finally, we would like to express our heartfelt gratitude to our family for their support.

We thank all these people for their helps and kindness. Although critics are sometimes a bitter pill to swallow, we can now look back and agree that greatly strengthened the final proceed.

ABSTRACT

Transgender carry the meaning of those person whose gender are different than the original identity, behaving differently than their assigned sex at birth. Those that are categorized under transgender can be understood by their internal sense of either being female, male, or anything else. They also have gender expressions that differ than others. The way they carry themselves through their voice, hairstyle, body language, and behavior are very contradicted from normal gender identity. Society's perception, awareness, openness, and knowledge towards them are constantly changing and keep growing. This research is done to study the association between public awareness and rights to be employed among the transgender, the association between public awareness and rights to receive appropriate healthcare services among the transgender and the association between public awareness and rights to receive proper education among the transgender. All data are collected through primary and secondary data, in which, the primary data is in the form of questionnaire to be distributed to the target respondents and secondary data are in the forms of trusted sources, such as research study, e-journals and journal articles which focus on the issue of transgender discriminations. 100 staffs from Legal Department, Health and Urban Services Department, Human Resource Development Department, Landscape Department and Procurement and Tender Contracts Unit will be selected to become the respondents from the Kota Kinabalu City Hall (DBKK), in which, the staffs comprised of married couples and single people that have been working from three until 21
