Acknowledgement

Alhamdulillah thanks to Allah cause giving us an opportunity to complete our Final Year Project titled “ The Comparison Of ECVT and Proton Automotive Gear Box” successfully . Without patience and commitment of us , we cannot complete this project on time it’s needed . A lot of time and money spend to settled down this project .

We hope with this project that we present in this report will give knowledge for those who are reading this report . We hope this starting point that we create will give an idea to who interested in gear box research and study .

We want to contribute our special thanks to :-

1. Mr. Adam Mohlis Moklas

Technician

2. Mr. Ramli Badron

Technician

3. Mr. Sulaiman Mohamed

Assistant Lecturer

4. Mr. Mazani

Supervisor Of FIAT Service Center

5. Pn. Normah

UiTM Account Department (Engineering)

Lastly , we hope that , what we want will be realize and give a benefit to new comers in this field .

Abstract

The titles of our final project The Comparison Between Proton Automatic and ECVT gearbox. The purpose of this study shall be concerning about the two different type of gearbox. Here we try to find the major different between the two types of gearbox.

We re trying to find as much as we can about the different of the gearbox. The we write it in this report clearly to show the different about it. The explanation in this report we divide into two part. Usually the first part mention about Proton Gearbox and the second part mention about ECVT. Except in the sixth chapter. The ECVT comes first.

This project is done to make all of future student more easily to know about ECVT. As we know ECVT is the new technology gearbox and seldom discovered by student.

In future student must try to improve the project about ECVT because nowadays manufacturer using ECVT for latest car. This is proving that there is too many advantages about ECVT. Now automakers try to commercialize ECVT by fixing it into commercial vehicle.

Table of content

Acknowledgement	i
Abstract	ii
Chapter 1	
Introduction	
1.1 The purpose of the project	1
1.2 Objectives	1
Chapter 2	
Main component and function	
2.1 PROTON AUTOMATIC TRANSMISSION	
2.1.1 Introduction	2
2.1.2 General information of automatic transmission F3A21	5
2.1.3 Torque converter	6
2.1.4 Transmission mechanism	8
2.1.5 Multiple disc clutch	10
2.1.5.1 Front clutch	12
2.1.5.2 Rear clutch	13
2.1.6 The brake units	15
2.1.6.1 Kick down brake	16
2.1.6.2 Low reverse brake	18
2.1.7 One-way clutch	20
2.1.8 Planetary gear set	22

2.2	ECVT	
2.2.1	Introduction	24
2.2.2	Components	24
2.2.3	Function of each component	26
2.2.4	Basic operation	28

Chapter 3
Torque multipliers

3.1	PROTON (Fundamentals of fluid coupling and torque converter)	
3.1.1	General information	29
3.1.2	A simple fluid coupling	29
3.1.3	Fluid coupling construction	31
3.1.4	Operation of fluid coupling	33
3.1.5	Fluid coupling in action	35
3.1.6	Vortex, rotary and turbulent flow	37
3.1.7	Changing the direction of oil flow	39
3.1.8	The stator job	41
3.1.9	Three elements of torque converter	44
3.1.9.1	Toque converter pump impeller	46
3.1.9.2	Turbine	48
3.1.9.3	Stator assembly	50
3.2	ECVT (electromagnetic powder clutch)	
3.2.1	Electromagnetic powder clutch components	52
3.2.2	The operation	54
3.2.3	Signals receive by the electronic control unit (ECU)	56
